|-----------------------------------|--|--|--|--|--|--|
| | Syllabus of S. Y. B | 3. Tech. (All branches) | | | | |
| Course Code: | BSC204 | Credits: 3-1-0 | | | | |
| Course: Linear | Algebra & Transform | Mid Semester Examination-I: 15 Marks | | | | |
| Teaching Sche | me: | Mid Semester Examination-II: 15 Marks | | | | |
| Theory: 03 Hr | rs/week | Continuous In-semester Evaluation: 10 Marks | | | | |
| Tutorial: 01 H | :/week | Teacher Assessment: 10 Marks | | | | |
| | | End Semester Examination: 50 Marks | | | | |
| | | End Semester Examination (Duration): 02 Hrs | | | | |
| Prerequisite | Basic formulae of trigonometr | ry, Derivative, Integration, Basic knowledge of | | | | |
| Trerequisite | Determinant and Matrices. | | | | | |
| Course Objectives | 2. To understand and solve higher order differential equations and apply then | | | | | |
| Unit-I | Complex Number Introduction to complex number, De-Moivrer's theorem, root of complex number, circular function & hyperbolic function, relation between circular & hyperbolic function, inverse hyperbolic functions, separation of real & imaginary parts, Logarithm of complex quantity. (07 Hrs) | | | | | |
| Unit-II | Matrix Introduction to matrix, rank of matrix-echelon form, normal form, solution of simultaneous linear equations (homogeneous & non homogeneous). Eigen values and Eigen vectors, Cayley-Hamilton theorem. (06 Hrs) | | | | | |
| Unit-III | Probability Distribution Introduction, Probability of distribution, Normal distribution | distribution: Binomial distribution, Poisson on. | | | | |

Syllabus of Second Year B.Tech. 2022-23

1 of 52

(05 Hrs)

| | Line | ar Differential Equation | & Its Applications | | | | | |
|------------|------------------------|---|------------------------|----------------------|--------------------|--|--|--|
| | Solut | tion of nth order linear | differential equation | n with constant co | pefficients: | | | |
| Unit-IV | Com | Complementary function, Particular integral- short method, method of variation | | | | | | |
| | of pa | of parameters, Application of Linear differential equation to electrical circuit, | | | | | | |
| | Civil | and mechanical. | | | (06 Hrs) | | | |
| | Lapl | ace Transform | | | | | | |
| | Defin | nition, Laplace Transfo | orms of elementary | functions, Theo | rems and | | | |
| | prope | erties of Laplace transfe | orm (without proof |): First shifting a | nd second | | | |
| Unit-V | shifti | ng theorem, Change of s | scale, Multiplication | by t , Division by | t, Laplace | | | |
| | trans | form of Derivatives, Lap | lace transform of in | tegral, Evaluation o | of integrals | | | |
| | using | Laplace transform, Lap | lace transform of U | nit step function a | nd Dirac's | | | |
| | delta function. (06 Hr | | | | | | | |
| | Inve | Inverse Laplace transform | | | | | | |
| | Defin | Definition, Inverse Laplace transforms using: a) Some elementary functions | | | | | | |
| Unit-VI | b) Th | b) Theorem and properties of Laplace transform c) Partial fraction method | | | | | | |
| | d) C | d) Convolution theorem. Application of Laplace transform to solve linear | | | | | | |
| | diffe | rential equations with give | en initial conditions. | | (06 Hrs) | | | |

Chairman Board of Studies
Computer Science & Engineering
MIT Aurangabad
(An Autonomous Institute)

| | (Faculty of Science & Technology) | | | |
|------------------|--|--|--|--|
| | Syllabus of S. Y. B. Tech. (| AIDS) Semester III | | |
| Course Code: Al | D201 | Credits: 3-0-0 | | |
| Course: Data Str | uctures and Algorithms | Mid Semester Examination-I: 15 Marks | | |
| Teaching Schem | e: | Mid Semester Examination-II: 15 Marks | | |
| Theory: 03 Hrs / | week | Continuous In-semester Evaluation: 10 Marks | | |
| | | Teacher Assessment: 10 Marks | | |
| 8 | | End Semester Examination: 50 Marks | | |
| | | End Semester Examination (Duration): 02 Hrs | | |
| Prerequisite | Programming language, Mathematics a | and Statistics, Good Logical Thinking | | |
| | 1. To introduce data abstraction and o | lata representation in memory | | |
| | 2. To describe, design and use of elementary data structures such as stack, queue, | | | |
| Ohiostinos | linked list, tree and graph | | | |
| Objectives | 3. To discuss decomposition of complex programming problems into manageable su | | | |
| | problems | | | |
| | 4. To introduce algorithms and their complexity. | | | |
| | Introduction to Data Structures & Algorithms | | | |
| Unit-I | Data types, Data structure and Abstract date type, Dynamic memory allocation | | | |
| Unit-1 | in C, Introduction to Algorithms, Asymptotic notations and common functions | | | |
| | (6 Hrs) | | | |
| | Stack | | | |
| | Basic Concept of Stack, Stack as an | ADT, Stack Operations, Stack Applications | | |
| | Conversion from infix to postfix/prefix expression, Evaluation of postfix/ prefix | | | |
| Unit-II | expressions, Recursion | | | |
| | Queue | | | |
| 520 | Basic Concept of Oueue, Oueue a | s an ADT, Primitive Operations in Queue, | | |
| | Linear Queue, Circular Queue, Queue Applications (06 Hrs) | | | |
| | Lists | (101110) | | |
| Unit-III | | gray Implementation of Lists Linkad List | | |
| | Basic Concept, List and ADT, Array Implementation of Lists, Linked List, | | | |

Syllabus of Second Year B.Tech. 2022-23

| | Туре | es of Linked List: Singly Lin | ked List, Doubly Link | ed List, Circul | ar Linked | | |
|------------|--|---|-------------------------------|-------------------|-----------------|--|--|
| | List. | Basic operations in Linke | ed List: Node Creation | on, Node Inser | rtion and | | |
| | Dele | tion from Beginning, End | and Specified Positio | n, Stack and | Queue as | | |
| | Link | ed List | | | (06 Hrs) | | |
| | Tree | s and Graphs | | | | | |
| | Conc | cept and Definitions, Basic C | Operations in Binary T | Tree, Tree Heig | ht, Level | | |
| Unit-IV | and | Depth, Binary Search Tree | e, Insertion, Deletion, | Traversals te | chniques, | | |
| | Searc | ch in BST, Applications of T | rees, Graph: Definition | n and Represen | ntation of | | |
| | Grap | hs, Graph Traversal techniqu | ies. | | (06 Hrs) | | |
| | Sorti | ing | | | | | |
| | Intro | duction and Types of sorti | ing: Internal and Ext | ernal sort, Co | mparison | | |
| | Sorti | ng Algorithms: Bubble, Sele | ction and Insertion So | rt, Shell Sort, E | Efficiency | | |
| | of So | of Sorting Algorithms | | | | | |
| Unit-V | Searching and Hashing | | | | | | |
| | Introduction to Searching, Search Algorithms: Sequential Search, Binary Search | | | | | | |
| | Efficiency of Search Algorithms Hashing: Hash Function and Hash Tables, | | | | | | |
| i | Collision Resolution Techniques. (06 Hrs) | | | | | | |
| | | rithmic Techniques | | | | | |
| | Divide-n- Conquer: General Strategy, Merge and Quick Sort, Greedy Approach: | | | | | | |
| Unit-VI | General Strategy, Minimum Cost Spanning Trees: Kruskal and Prims | | | | | | |
| | Algorithm (06 Hrs) | | | | | | |

QU

Syllabus of Second Year B.Tech. 2022-23

(Faculty of Science & Technology)

Syllabus of S. Y. B. Tech. (AIDS) Semester III

Course Code: AID221 Credits: 0-0-1

Course: Lab-I Data Structures and Algorithms

Teaching Scheme:
Practical: 02 Hrs/week

End Semester Examination / Oral: 25 Marks

| Objectives | To acquire practical knowledge of data structures and Algorithms |
|------------|--|
| | The laboratory work includes. |
| | 1 Write a program with dynamic memory allocation and de-allocation. |
| | 2 Write a program to implement stack operations. |
| | 3 Write a program using stack to convert infix expression to postfix/prefix expression |
| | and to evaluate postfix/prefix expression. |
| | 4 Write a program to implement queue operations for linear, circular, and priority |
| List of | queue. |
| Practical | 5 Write recursive program to implement factorial, Fibonacci sequence, GCD, and |
| | Tower of Hanoi algorithms. |
| | 6 Write a program to implement list using array and linked list. |
| | 7 Write a program for linked list implementation of stack and queue. |
| | 8 Write a program to implement sorting, searching and hashing algorithms. |
| | 9 Write a program to implement Binary Search Trees. |
| | 10 Write a program to implement searching, spanning tree. |
| | |

| | (Faculty of Science & Technology) | | | | | | | |

| | Syllabus of S. Y. B. Tech. (AIDS) Semester III | | | | | | | |
| Course Co | de: AID222 | Credits: 0-0-1 | | | | | | |
| Course: La | Course: Lab-II: Introduction to AI Teachers Assessment: 25 Marks | | | | | | | |
| Teaching S | Scheme: | | | | | | | |
| Practical: (| 02 Hrs/week | | | | | | | |
| Objectives | To apply various search algorithms of artificial intelligence. | | | | | | | |
| Objectives | To implement different algorithms of Artificial Intelligence. | | | | | | | |
| | 1. Study of PROLOG Programming and its Functions | | | | | | | |
| | 2. Write a python program to solve Tower of Hanoi | | | | | | | |
| | 3. Write a python program to implement | Breadth First Search Traversal? | | | | | | |
| | 4. Write a python program to implement Depth first search? | | | | | | | |
| List of Practical | 5. Write a program to implement Hangman game using python. | | | | | | | |
| Fractical | 6. Write a python program to solve 4-Que | eens problem | | | | | | |
| | 7. Write a program to solve Tic-Tac-Toe using Min-Max search | | | | | | | |
| | 8. Write a python program to solve 8 Puz | zle problems | | | | | | |
| | 9. Write a python program to solve Trave | ling salesman problem | | | | | | |

(Faculty of Science & Technology) Syllabus of S. Y. B. Tech. (AIDS) Semester III Course Code: AID223 Credits: 0-0-1 Course: Lab-III: Object oriented programming Teachers Assessment: 25 Marks Teaching Scheme: End Semester Examination / Oral: 25 Marks Practical: 02 Hrs/week To implement Object Oriented Programming concepts using Java. To implement packages, inheritance and interfaces. **Objectives** To handle exceptions and use I/O streams To design and implement simple Graphical User Interfaces Develop a program to declare a class called 'student' having data members name, roll no and percentage. Accept and display this data for a single object. Write a program to insert an element (specific position) into an array. 3. Write a program that creates box Object and use constructor overloading and return result to calling method. Write a program that implements multilevel inheritance Write a program for implementing an interface. List of Practical Write a program to create a package. Write a program to handle Arithmetic exception. Write a program for creating, opening, closing, reading and writing a file.

318

Syllabus of Second Year B.Tech. 2022-23

Write a program to create multiple threads.

10. Write a program to create an applet.

| | Syllabus of S. Y. B. Tech. (CSE) Semester III | | | | | | | |
| Course Co | ourse Code: AID224 Credits: 0-0-1 | | | | | | | |
| Course: La | b-IV: Microprocessors and Microcontrollers | End Semester Examination / Oral: 25 | | | | | | |
| Teaching S | Scheme: | Marks | | | | | | |
| Practical: 2 | 2. Hrs/week | | | | | | | |
| | 1. To demonstrate the concept logic gates | , design of combinational and sequential logic | | | | | | |
| Objectives | circuits | * | | | | | | |
| Objectives | 2. To use addressing modes & instruction se | et to implement programs for microprocessor and | | | | | | |
| | micro-controller | | | | | | | |
| | 1. Implementation of Boolean expression using AND/OR/NOT logic. | | | | | | | |
| | 2. Implementation of Boolean expression using | ng NAND/NOR logic. | | | | | | |
| | 3. Realization of Half & Full Adder using logic gates. | | | | | | | |
| | 4. Realization of Half & Full Sub-tractor usin | g logic gates. | | | | | | |
| List of | 5. Design & Implement 8:1 Multiplexer using | logic gates. | | | | | | |
| Practical | 6. Design & Implement 1:8 De-multiplexer us | sing logic gates. | | | | | | |
| | 7. Demonstrate the working of flip-flop. | | | | | | | |
| | int the string in 8086. | | | | | | | |
| | 9. Write an Assembly language program for 8 | -bit & 16-bit addition in 8086. | | | | | | |
| | 10. Write an Assembly language program for | 8-bit &16-bit subtraction in 8086. | | | | | | |

| | (Faculty of Science & | Technology) | | | | | |
|-----------------------|--|--|--|--|--|--|--|
| | Syllabus of S. Y. B. Tech. (| CSE) Semester III | | | | | |
| Course Co | Course Code: AID225 Credits: 0-0-1 | | | | | | |
| Course: La | b-V Data Analytics Lab | Teachers Assessment: 25 Marks | | | | | |
| Teaching Scheme: | | | | | | | |
| Practical: 2 Hrs/week | | | | | | | |
| | 1. Understand the R Programming Languag | ge. | | | | | |
| Objectives | 2. Exposure on visualizing data science pro | blems. | | | | | |
| | 3. Understand the classification and Regres | sion Model. | | | | | |
| | 1. Introduction to R Programming and Study | of basic Syntax in R | | | | | |
| | 2. R as a Calculator application | | | | | | |
| | a. Using with and without R objects on co | nsole | | | | | |
| | b. Using mathematical functions on console | | | | | | |
| | c. Write an R script, to create R objects for calculator application and save in a | | | | | | |
| | specified location in disk. | | | | | | |
| | 3. Descriptive Statistics In R | | | | | | |
| | a. Write an R script to find basic descriptiv | e statistics using summary, str, quartile function | | | | | |
| | b. Write an R script to find subset of datase | et by using subset (), aggregate () functions on | | | | | |
| | sample dataset | | | | | | |
| | 4. Reading and Writing Different Types of Datasets | | | | | | |
| List of Practical | a. Reading different types of data sets (.txt, .csv) from Web and disk and writing in file | | | | | | |
| | in specific disk location. | | | | | | |
| | b. Reading Excel data sheet in R. | | | | | | |
| | c. Reading XML dataset in R. | | | | | | |
| | 5. Visualizations | | | | | | |
| | a. Find the data distributions using box and scatter plot. | | | | | | |
| | b. Find the outliers using plot. | | | | | | |
| | rt on sample data | | | | | | |
| | • | structures in R and calculate mean mode median | | | | | |
| | for a dataset | | | | | | |
| | 6. Correlation and Covariance | | | | | | |
| | a. Find the correlation matrix. | | | | | | |

- b. Find the outliers using plot.
- c. Plot the correlation plot on dataset and visualize giving an overview of relationships among data.
- 7. Regression Model

Import a data from web storage. Name the dataset and now do Linear/Logistic Regression to find out relation between variables that are affecting the admission of a student in an institute based on his or her entrance score

- 8. Classification Model
 - a. Install relevant package for classification.
 - b. Choose classifier for classification problem.
 - c. Evaluate the performance of classifier.
- 9. Clustering Model
 - a. Clustering algorithms for unsupervised classification.
 - b. Plot the cluster data using R visualizations.
- 10. Mini Project

(An Autonomous Institute)

(Faculty of Science & Technology) Syllabus of S. Y. B. Tech. (AIDS) Semester IV

Course Code: AID271 Credits: 0-0-1

Course: Lab-I: Database Management System | End Semester Examination / Oral: 25 Marks

Teaching Scheme:

| Practical: 03 Hrs/week | | | | | |
|--|---|-----------------------------|---------------------------|-----------------|-----------------|
| Prerequisite | Knowledge of programming language. | | | | |
| 1. Creation of Database, tables using DDL, DML SQL commands. | | | commands. | | |
| | 2. App | olying keys and constraints | s on tables. | | |
| | 3. Ret | rieving data using wild car | ds and pattern matchin | g. | |
| | 4. Per | form various data manipul | ation commands, aggre | gate functions | and |
| | sorting | g techniques. | | | |
| Objectives | 5. App | oly the concept of Aggrega | ting Data using group | by and having o | clause. |
| Objectives | 6. Use | of set operators to combine | ne the result of multiple | queries. | |
| | 7. Solve queries using the concept of sub query. | | | | |
| | 8. Displaying data from multiple tables using Joins. | | | | |
| | 9. Implementation of Views. | | | | |
| | 10. Im | plementation of Stored Pr | ocedure. | | |
| | 11. Apply the concept of security and privileges. | | | | |
| Software | Any ERD Design Tool (like dbdiagram.io.,draw.io.,Lucidchart. | | | t. | |
| Software | • | Any SQL interface (like | Oracle, MySQL, Postg | res., etc). | |

| | 1. Programming skills in Html5, CS | S3, Bootstrap 4. | | | |
| Objectives | 2. Developing skills of Web Appli | ications user interactions using JavaScript, | | | |
| Objectives | РНР | | | | |
| | 3. Web application Development Da | atabase with React and React Native. | | | |
| | 1. HTML LAYOUTS AND LINKS | | | | |
| | Develop a web application to control over different layouts. | | | | |
| | Create a webpage with HTML describing your department use paragraph | | | | |
| | and list tags. | | | | |
| | Apply various colors to suitable distinguish key words, also apply font | | | | |
| | styling like italics, underline and two other fonts to words you find | | | | |
| | appropriate, also use header tags | 3. | | | |
| | • Create links on the words e.g. "V | Wi-Fi" and "LAN" to link them to | | | |
| List of | Wikipedia pages. | | | | |
| Practical | 2. WEB APLLICATION DESIGN F | ORMTTING | | | |
| | Develop a web application with | background banner image and navigation | | | |
| | menus. | | | | |
| | • Develop a web application with | responsive images. | | | |
| | Develop a web application using | g left menu. | | | |
| | Develop setting to change the th | eme of entire web Application. | | | |
| | 3. INTRODUCTION TO RESPONSIVE INTERFACE USING BOOTSRAP. | | | | |
| | Write code for developing responsive we | b application with Admin panel and tables | | | |
| | with static data. | | | | |
| | 4. BUIDLING INTERFACES USING | JAVASCRIPT | | | |

Syllabus of Second Year B.Tech. 2022-23

Write JavaScript to validate the following fields of the Registration page.

- First Name (Name should contains alphabets and the length should not be less than 6 characters). Password (Password should not be less than 6 characters length).
- E-mail id (should not contain any invalid and must follow the standard pattern name@domain.com)
- Mobile Number (Phone number should contain 10 digits only).
- Last Name and Address (should not be Empty).

5. INTRODUCTION TO INTERATIVE FORMS

- Developing Web Page Styles using JavaScript and CSS,
- Develop Script interactive forms

6. PHP

- A web application that takes a name as input and on submit it shows a hello page where name is taken from the request. It shows the start time at the right top corner of the page and provides a logout button. On clicking this button, it should show a logout page with Thank You message with the duration of usage (hint:Use session to store name and time).
- A web application that lists all cookies stored in the browser on clicking "List Cookies" button. Add cookies if necessary

7. Database Handling

Implement the web applications with Database using PHP

1. Mini project based on above technologies.

44 of 52

Chairman Board of Studies
Computer Science & Engineering
MIT Aurangabad
(An Autonomous Institute)

(Faculty of Science & Technology)

Syllabus of S. Y. B. Tech. (AIDS) Semester IV

Course Code: AID274 Credits: 0-0-1

Course: Lab-V: Problem Based Learning Teacher Assessment: 25 Marks

Teaching Scheme: Practical: 02 Hrs/week

Course Objectives:

On completion of the course, learner will be able to –

- To develop positive attitude, new skills or new ways of thinking.
- To introduce independent and group learning by solving real world problem with the help of available resources.
- To be able to develop systematic approach in technical documentation.
- To select and utilize appropriate Software tools/Equipment/Problem solving tools to solve real life problems.

Guidelines:

The students plan, manage and complete a activity which addresses the stated problem.

- 1. The students must work in group to solve real life problem.
- 2. A mentor to be assigned to 3-4 groups / one batch.
- 3. The steps to be followed for problem based learning are as mentioned below:

Step 1: Explore the issue.

Gather necessary information; learn new concepts, principles, and skills about the proposed topic.

Step 2: State what is known.

Individual students and groups list what they already know about the scenario and list what areas they are lacking information.

Step 3: Define the issues.

Frame the problem in a context of what is already known and information the students expect to learn.

Step 4: Research the knowledge.

Syllabus of Second Year B.Tech. 2022-23

45 of 52

Chairman Board of Studies Computer Science & Engineering MIT Aurangabad (An Autonomous Institute)

Find resources and information that will help create a compelling argument.

Step 5: Investigate solutions.

List possible actions and solutions to the problem, formulate and test potential hypotheses

Step 6: Present and support the chosen solution.

Clearly state and support your conclusion with relevant information and evidence.

Step 7: Review your performance.

Often forgotten, this is a crucial step in improving the problem-solving skills. Students must evaluate their performance and plan improvements for the next problem.

Recommended parameters for assessment, evaluation and weightage:

- 1. Identification of the Problem (20%)
- 2. Documentation (Gathering requirements, design & modeling, implementation/execution, use of technology and final report, other documents). (30%)
- 3. Demonstration (Poster Presentation/Model Exhibition etc). (20%).
- 4. Awareness /Consideration of Environment/ Social /Ethics/ Safety measures/Legal aspects. (10%)
- 5. Outcome (Participation in technical events / publication in national international conference journal/copyright/patent/prototype). (20%)
