Question paper shall be based on all 5 units in the syllabus. Question number 1 is compulsory and shall be of objective nature (Multiple Choice Questions, fill in the blanks etc.) and should cover the entire syllabus. Students must solve any THREE questions from remaining five questions based on each unit.

For 25 Marks Paper:

- 1. Six questions.
- 2. Question no 1 is compulsory and should cover complete syllabus of the respective course for 10 marks.
- 3. Remaining five questions will be of 5 marks each.

Any Three questions of 5 marks each from remaining questions are to be solved.

Any Three questions of 5 marks each from remaining questions are to be solved.

Credits
Sr.No.

List of Experiments (Any Five)

1 Measurement of angle with the help of sine bar/ Vernier Bevel protractor.

2 Study and sketch of various types of optical projectors.

3 Study and sketch of various types of comparators and use them for comparing length of given piece.

4 To measure the diameter of a hole with the help of precision balls.

5 To measure external and internal taper with the help of taper gauges, precision for the square-ness of a component with auto-collimeter.

6 To test the square-ness of a component with auto-collimeter.

7 To measure the piech, angle and form of thread of a screw.

8 To measure the unsulphtness of the edge of a component with the help of onto-collimeter.

9 To measure the tength, breadth, thirdness, depth, height with micrometer.

10 To measure the length, breadth, thirdness, depth, height with micrometer.

11 To measure the length, breadth, thirdness, depth, height with height gauge and Vernier calipers/micrometers.

12 Calibration of Vernier calipers/micrometers.

Question paper shall be based on all 5 units in the syllabus. Question number 1 is compulsory and shall be of objective nature (Multiple Choice Questions, fill in the blanks etc.) and should cover the entire syllabus. Students must solve any THREE questions from remaining five questions based on each unit.

For 25 Marks Paper:

- 1. Six questions.
- 2. Question no 1 is compulsory and should cover complete syllabus of the respective course for 10 marks.
- 3. Remaining five questions will be of 5 marks each.

Any Three questions of 5 marks each from remaining questions are to be solved.

4.	Refrigeration and Airconditioning	Manohar	New Age International (P)
		Prasad	limited, New Delhi

Question paper shall be based on all 5 units in the syllabus. Question number 1 is compulsory and shall be of objective nature (Multiple Choice Questions, fill in the blanks etc.) and should cover the entire syllabus. Students must solve any THREE questions from remaining five questions based on each unit.

For 25 Marks Paper:

- 1. Six questions.
- 2. Question no 1 is compulsory and should cover complete syllabus of the respective course for 10 marks.
- 3. Remaining five questions will be of 5 marks each.

Any Three questions of 5 marks each from remaining questions are to be solved.

			71:Basic Electrical Electronics Lab			Semester-II
Teaching Scheme			Exa	mination S	Scheme	
Practical Hours/week		Hours/week		TA	25	Marks
Credits 1.5		1.5		ESE/PE		Marks
Sr.No.		experiments)	List of Exp	eriments		.071719
	Any e	eight (Four fro	om each Basic Elec	trical and Ele	ectronis)of	the following
	practical should be performed and recorded in laboratory book					
	Basic	Electrical	used in refrigeration-	compressors i		

- 1. Verify that resistance of conductor is directly proportional to resistivity and length and inversely proportional to cross- sectional area of the conductor.
- 2. Verification of Ohm's Law.
- 3. Verification of temperature co-efficient of resistance:
- (i) Positive for Tungsten and Nichrome and
- (ii) Negative for carbon.
- 4. Study of series resistive circuits.
- 5. Study of parallel resistive circuits.
- 6. Study of series and parallel connection of cells in circuits.
- 7. Preparation of Electrolyte for lead acid battery and its charging and

BasicElectronics

- 1. Study of current and voltage measurement using Ammeter and Voltmeter.
- 2. Study of current and voltage measurement using Galvanometer.
- 3. Study of current, voltage and resistance measurement using of Multi-meter
- 4. Study of Power and Energy measurement using Wattmeter and Energy meter.
- 5. Study of working principle of Signal Generator and measurement of amplitude, time period and frequency of signal using Oscilloscope.
- 6. Study of V-I Characteristic of Diode.
- 7. Study of V-I Characteristic of Zener Diode. And use of Zener Diode as voltage

The assessment of term work shall be done based on the following.

- Continuous assessment
- Performing the experiments in the laboratory
- Oral examination conducted on the syllabus and term work mentioned above.
