### Open Elective-2 Course Basket:

Course Code	Course Title	Name of Department offering the Course
OEC291A	Smart Agriculture Practices	Agricultural Engineering
OEC291B	Solid Waste Management	Civil Engineering
OEC291C	Data Communication	Computer Science and Engineering
OEC291D	E-Waste Management	Electronics and Computer Engineering
OEC291E	Programmable Logic Controller	Electrical Engineering
OEC291F	Information and Knowledge Management	Emerging Science and Technology
OEC291G	Renewable Energy Resources	Mechanical Engineering
OEC291H	Plastic Recycling	Plastic & Polymer Engineering

Students may opt for Exit after successful completion of Second Year provided s/he earns 8 additional credits through coursework (VSEC) and/or Internship/OJT during the summer vacation. S/he will be awarded a 2-Year UG Diploma in Artificial Intelligence and Data Science. Details are available at the Department.

<b>Faculty of Science &amp; Technology</b> <b>Syllabus of Second Year B. Tech (Artificial Intelligence and Data Science) (Semester III)</b>	
<b>Course Category:</b> PCC <b>Course Code:</b> AID201 <b>Course:</b> Discrete Mathematics <b>Teaching Scheme:</b> Theory- 3 Hrs./week	<b>Credits: 3-0-0</b> In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 2 Hrs.
<b>Prerequisite</b>	Basic Mathematics
<b>Objectives</b>	<ul style="list-style-type: none"><li>• To use appropriate set, function and relation models to understand practical examples, and interpret the associated operations and terminologies in context.</li><li>• Determine number of logical possibilities of events.</li><li>• Learn logic and proof techniques to expand mathematical maturity.</li><li>• Formulate problems precisely, solve the problems, apply formal proof techniques, and explain the reasoning clearly.</li></ul>
<b>Unit-I</b>	<b>Set Theory and Propositional Logic:</b> <b>Set Theory:</b> Basic concepts of set theory, Operations on Sets, the power set. Finite, infinite and uncountable infinite sets, Cardinality of finite sets, principle of inclusion and exclusion. <b>Introduction to Logic.</b> Propositional Logic, Truth tables, Predicates and Quantifiers, Propositional equivalence, Mathematical Proofs. Infinite sets, well-ordering. Mathematical Induction. <p style="text-align: right;">(07 Hrs.)</p>
<b>Unit-II</b>	<b>Relation and Function :</b> <b>Relations:</b> Ordered pairs and n-tuples, Product Sets and Partitions, Relations and Digraphs, Matrix of Relation, Properties of Relations, Equivalence Relations & Partitions, Manipulation of Relations, Composition of Relations, Transitive Closure of a relation, Partial order relation, Partially ordered set, Hasse Diagrams. <b>Functions:</b> Definition, Composition of functions, Types of Functions, Invertible, Function, Pigeonhole Principle with Simple Applications. <p style="text-align: right;">(08 Hrs.)</p>
<b>Unit-III</b>	<b>Counting Principles:</b> The Basics of Counting, rule of Sum and Product, Permutations and Combinations, Binomial Coefficients and Identities, Generalized Permutations and Combinations, Algorithms for generating Permutations and Combinations. <p style="text-align: right;">(05 Hrs.)</p>
<b>Unit-IV</b>	<b>Discrete Numeric Functions and Recurrence Relations:</b> <b>Discrete numeric functions and generating function:</b> Introduction, manipulation of numeric functions, Asymptotic-behaviour of numeric functions, generating function.

	<b>Recurrence Relations and Recursive Algorithms:</b> Introduction, recurrence relations, linear recurrence relations with constant coefficients, homogeneous solutions, particular solutions, total solution. Solution by the method of generating functions. <p style="text-align: right;">(07 Hrs.)</p>				
<b>Unit-V</b>	<b>Graph and Trees:</b> <b>Graph:</b> Basic terminology, multi-graph and weighted graphs, path and circuits, short path in weighted graphs- Dijkstra algorithm. Eulerian path and circuits, Hamiltonian path and circuits. Factors of a graph, planer graph, graph coloring. <b>Trees:</b> Trees, rooted trees, path lengths in rooted trees, pre-fixed codes, spanning trees and cut sets. <p style="text-align: right;">(07 Hrs.)</p>				
<b>Unit-VI</b>	<b>Algebraic Structures:</b> The structure of algebra, Algebraic Systems, Semi Groups, Monoids, Groups, Homomorphism and Normal Subgroups, Rings, Integral Domains and Fields. <p style="text-align: right;">(05 Hrs.)</p>

	6.	Discrete Mathematics	N. Biggs	Oxford University Press,	Third

Faculty of Science & Technology	
Syllabus of Second Year B. Tech (Artificial Intelligence and Data Science) (Semester III)	
Course Category: <b>PCC</b> Course Code: AID202 Course: <b>Data Structures</b> Teaching Scheme: Theory: 02 Hrs/week	<b>Credits: 2-0-0</b> In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15 Marks Continuous Internal Evaluation: 10 Marks Teacher Assessment: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs
<b>Prerequisite</b>	'C' programming language for the implementation of data structures.
<b>Objectives</b>	<ol style="list-style-type: none"><li>To understand the concept of ADT and data structures.</li><li>To learn linear data structures- stack, queue, linked list.</li><li>To apply non-linear data structures tree and graph for solving real-world problems.</li><li>To understand sorting, searching algorithms and hashing techniques.</li></ol>
<b>Unit-I</b>	<b>Introduction to Data Structures</b> Concept of Data and Information, Abstract Data types- basics, importance, Data Structures- Definition, classification, implementation aspects and memory representation, examples, applications. Introduction to linear data structure- Array and its operations. <b>(04 Hrs.)</b>
<b>Unit-II</b>	<b>Stacks and Queues</b> Stack- definition, terminology, memory representation, operations on stack- push, pop, peek, empty, full, implementation using arrays. Applications of stack- recursion, polish and reverse-polish notations- conversion and evaluation. Queues- definition, terminology, memory representation, operations on queue, implementation using array, Types of queues and their applications. <b>(04 Hrs.)</b>
<b>Unit-III</b>	<b>Linked Representation</b> Concept of Dynamic Memory Allocation. Linked List- definition, memory representation, importance, types- singly linked list, doubly linked list, circular linked list, Operations on linked lists. Applications of linked list- polynomial manipulation. <b>(05 Hrs.)</b>
<b>Unit-IV</b>	<b>Trees</b> Tree- Basic terminology. Binary tree- definition, types- complete, almost complete, strictly binary tree. Binary search tree- definition, operations- insertion, deletion, traversal- in-order, pre-order, post-order, level-order, search. Height Balanced Tree (AVL)-Importance, rotations- left, right, left-right, right-left, constructing an AVL tree. Introduction to B tree, B+ tree, threaded binary tree. <b>(04 Hrs.)</b>
<b>Unit-V</b>	<b>Graphs</b> Graphs- Basic terminology, representing graphs in memory. Graph Traversals-Breadth First Search, Depth First Search. Minimum Spanning Tree- definition, constructing minimum spanning tree- Kruskal's algorithm, Prim's Algorithm. <b>(04 Hrs.)</b>

# Maharashtra Institute of Technology

Chhatrapati Sambhajanagar  
(An Autonomous Institute)

<b>Unit-VI</b>	<b>Sorting and Searching</b> Sorting: Bubble sort, selection sort, insertion sort, heap sort, radix sort. Searching: Linear search, binary search. Hashing- concept, examples, collision, resolving collision. <b>(05 Hrs.)</b>
----------------	---

## Faculty of Science & Technology

### Syllabus of Second Year B.Tech. (All Branches) (Semester III)

#### Open Elective-1 offered by the Department of Basic Sciences and Humanities

<p>Course Category: <b>OEC</b>          Course Code: OEC241A          Course: <b>Introduction to Sociology</b>          Teaching Scheme: Theory: 03 Hrs./week</p>	<p><b>Credits: 3-0-0</b>          In-Semester Examination -I: 15 Marks          In-Semester Examination -II: 15Marks          Teacher Assessment: 10 Marks          Continuous Internal Evaluation: 10 Marks          End Semester Examination: 50 Marks          End Semester Examination (Duration):02 Hrs.</p>
<b>Prerequisite</b>	Communication Skills, critical thinking skills.
<b>Objectives</b>	<p>The objective of this course is to let the students:</p> <ol style="list-style-type: none"> <li>1. Describe foundational sociological theories and concepts.</li> <li>2. Apply sociological perspectives to analyze social phenomena relevant to engineering contexts.</li> <li>3. Evaluate the impact of social factors on engineering practices and outcomes.</li> <li>4. Analyze ethical issues related to engineering in society.</li> <li>5. Develop critical thinking skills for assessing social implications of engineering projects.</li> <li>6. Communicate effectively about sociological issues within engineering communities.</li> </ol>
<b>Unit-I</b>	<p><b>Introduction to Sociology:</b> Definition and subject matter of sociology, Sociology as a science and its nature, Sociology as a means to establish social harmony, Scope of sociology and early thinkers, perspectives in sociology, functionalist perspective, conflict perspective, interactionist, sociology and other social sciences, society, evolution of societies, agrarian society, hunter-gatherer society, feudal society, information society, tribal society, industrial societies, postindustrial society.</p> <p style="text-align: right;"><b>(07 Hrs)</b></p>
<b>Unit-II</b>	<p><b>Socialization and Culture:</b> Definition and importance of socialization in shaping individual identity and behaviour, Primary socialization: Family, peers. Secondary socialization: School, media, religion, and other social institutions, workplace, Cultural Norms, Values, and Symbols.</p> <p style="text-align: right;"><b>(06 Hrs)</b></p>
<b>Unit-III</b>	<p><b>Social Structure and Inequality:</b> Social stratification and mobility, Race, class, gender, and intersectionality, social institutions (family, education, economy, politics), Social institutions, need of an institution, characteristics of institution, kinds of institutions, functions of institutions, primary institutions, difference between institution &amp; community: social stratification, gender stratification.</p> <p style="text-align: right;"><b>(06 Hrs)</b></p>
<b>Unit-IV</b>	<p><b>Social Change and Globalization:</b> Social change, theories of change types of theories of change, evolutionary, functionalist, conflict, factors of social change, resistance to change, Globalization and its consequences, social movements and activism.</p> <p style="text-align: right;"><b>(06 Hrs)</b></p>

*Shubh*

# Maharashtra Institute of Technology

Chhatrapati Sambhajanagar  
(An Autonomous Institute)

<b>Unit-V</b>	<b>Sociological Research Methods:</b> Ethical Considerations in Sociological Research, Informed consent, confidentiality and anonymity, avoiding harm to participants, Research ethics review processes, Qualitative and Quantitative Research Methods, Ethnography, Participant observation, Interviews, Focus groups, Case studies, Surveys, Experiments, Content analysis, Secondary data analysis. <p style="text-align: right;">(07 Hrs)</p>				
<b>Unit-VI</b>	<b>Engineering for Social Equity:</b> Sociology of technology, Engineering ethics and social responsibility, Sociotechnical systems and their impacts, Introduction to the concept of the Bottom of the Pyramid (BoP) and its significance in global engineering. Ethical considerations in designing products and services for BoP markets. Innovative design approaches for affordability, accessibility, and sustainability in BoP contexts. Strategies for designing inclusive and equitable sociotechnical systems that prioritize human well-being and social justice. Sociological dimensions of emerging technologies (e.g., AI, biotechnology, renewable energy). <p style="text-align: right;">(07 Hrs)</p>

<b>Prerequisite</b>	No general prerequisites required
<b>Objectives</b>	1. To develop an understanding of professional ethics in different organizational contexts. 2. To identify, analyze, and resolve ethical issues in business decision-making. 3. To develop various corporate social Responsibilities and practices in professional life
<b>Unit-I</b>	<b>Professional Ethics and Business:</b> The Nature of Business Ethics; Ethical Issues in Business; Moral Responsibility and Blame; Utilitarianism: Weighing Social Costs and Benefits; Rights and Duties of Business. <p style="text-align: right;">(06 Hrs)</p>
<b>Unit-II</b>	<b>Professional Ethics in the Marketplace:</b> Perfect Competition; Monopoly Competition; Oligopolistic Competition; Oligopolies and Public Policy Professional Ethics and the Environment: Dimensions of Pollution and Resource Depletion; Ethics of Pollution Control; Ethics of Conserving Depletable Resources. <p style="text-align: right;">(07 Hrs)</p>
<b>Unit-III</b>	<b>Professional Ethics of Consumer Protection:</b> Markets and Consumer Protection; Contract View of Business Firm's Duties to Consumers; Due Care Theory; Advertising Ethics; Consumer Privacy. <p style="text-align: right;">(06 Hrs)</p>
<b>Unit-IV</b>	<b>Introduction to Corporate Social Responsibility:</b> Concept, Scope & Relevance and Importance of CSR in Contemporary Society. CSR and Indian Corporations- Legal Provisions and Specification on CSR, A Score Card, Future of CSR. <p style="text-align: right;">(07 Hrs)</p>
<b>Unit-V</b>	<b>Exploring the Dualities of Business Sustainability:</b> Potential Business Benefits-Triple bottom line, Human resources, Risk management, Supplier relations; Criticisms and concerns of business; Motives; Misdirection. <p style="text-align: right;">(06 Hrs)</p>
<b>Unit-VI</b>	<b>Role of Business in Sustainable Development:</b> Sustainable Development, Role of Business in Sustainable Development, Sustainability Terminologies, Corporate Sustainability, Corporate Sustainability and Corporate Social Responsibility, Government

### Syllabus of Second Year B.Tech. (All Branches) (Semester III)

#### Open Elective-1 offered by the Department of Electrical Engineering

<b>Course Category:</b> OEC <b>Course Code:</b> OEC241E <b>Course:</b> Electrical, Fire and Vehicle Safety <b>Teaching Scheme:</b> Theory: 03 Hrs./week		<b>Credits:</b> 3-0-0 In-Semester Examination -I: 15 Marks In-Semester Examination -II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
<b>Prerequisite</b>	<ul style="list-style-type: none"><li>- Basic understanding of physics and chemistry concepts</li><li>- Familiarity with engineering principles, including circuit theory</li><li>- Knowledge of automotive technology, including vehicle components and systems.</li></ul>	
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. Develop a comprehensive understanding of electrical safety principles and hazards.</li><li>2. Analyze the causes and dynamics of fires and implement preventive measures.</li><li>3. Examine safety protocols and regulations pertaining to vehicle electrical systems.</li><li>4. Acquire practical skills in identifying, mitigating, and responding to safety risks.</li></ol>	
<b>Unit-I</b>	<b>Introduction to Electrical safety and Safety Management:</b> General Background of Electricity, General Safety Provisions in Indian Electricity Rules, OSHA Standards on Electrical Safety, Basic Electrical Safety Rule as per OSHA, Terms and Definitions, Objectives of Safety and Security Measures, Effect of Electrical Current on the Human Body, Case studies highlighting real-world examples of electrical fires and their consequences. <p style="text-align: right;">(07 Hrs)</p>	
<b>Unit-II</b>	<b>Electrical Shocks and their Prevention:</b> Primary and Secondary Electric shocks, Occurrence of Electric Shock, Possibility of Getting Electric Shock, Severity of Electric Shock, Medical Analysis of Electric Shock and Its Effects, AC Shocks Versus DC Shocks, Shocks Due to Flashovers, Lightning Strokes on Overhead Transmission Lines, Prevention of Shocks, FIRST AID, Removal of Contact with Live Conductor, Artificial Respiration, Schafer's Prone Pressure Method, Accident Management and Safety Management. <p style="text-align: right;">(06 Hrs)</p>	
<b>Unit-III</b>	<b>Introduction to Electrical Fire and Prevention:</b> Introduction, Terms and definition, causes of initiation of fires, types of Fires Class A Fires, Class B fires, Class C Fires, Class D fires, Class E Fires, Fire Extinguishing techniques, Fire Hazard Analysis, Prevention of Fires, Fire protection and loss prevention, step after occurrences of fires. <p style="text-align: right;">(06 Hrs)</p>

## Faculty of Science & Technology

### Syllabus of Second Year B.Tech. (All Branches) (Semester III / IV)

Course Category: **HSSM**

Course Code: HSM201

Course: **Engineering Economics and Management**

Teaching Scheme: Theory: 2 Hrs./week

**Credits: 2-0-0**

In-Semester Examination-II: 10 Marks

Teacher Assessment: 15 Marks

**Prerequisite** No general prerequisites required

#### Objectives

1. To introduce students to the fundamental principles of industrial management.
2. To familiarize students with various aspects of industrial operations.
3. To provide students with knowledge of real-world industrial management challenges.

#### Unit-I

**Introduction to Engineering Economics:** Introduction to Economics, Importance, and scope of economics in engineering, Economic analysis and its role in project management, Overview of economic principles and concepts relevant to engineering, Micro - and macro-economics, economics of growth and development, Demand and supply analysis.

(05 Hrs)

#### Unit-II

**Cash Flow and Time Value of Money:** Interest rates, compounding, and discounting, Present value and future value analysis, Equivalent annual cost analysis. Cash Flow – Diagrams, Categories & Computation, Calculations, Treatment of Salvage Value, Annual Cash Flow Analysis, Analysis, Calculating Rate of Return, Incremental Analysis.

(05 Hrs)

#### Unit-III

**Elements of Managerial Economics:** Cost & Cost Control –Techniques, Types of Costs, Lifecycle Costs, Budgets, Break-even Analysis, Capital Budgeting, Application of Linear Programming. Investment Analysis – NPV, ROI, IRR, Payback Period, Depreciation, Time value of money (present and future worth of cash flows). Business Forecasting – Elementary techniques.

(04 Hrs)

#### Unit-IV

**Business Organization:** Concept of organization, Elements of Organization, Types of Business organization, Principles of Organization, Organization structure.

(04 Hrs)

#### Unit-V

**Management Concept:** Management, Administration, Organization, Managerial skills, Evolution and development of Management Thought, Principles of Management, Functions of Management, Levels of Management.

(04 Hrs)

#### Unit-VI

**Human Resource Management:** Introduction, Definitions, and Concept of HRM, Functions and objectives of HRM, Manpower Planning, Recruitment and selection, Training and development, Compensation Management.

(04 Hrs)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III / IV)	
Course Category: <b>VEC</b> Course Code: VEC202 Course: <b>Environmental Studies</b> Teaching Scheme: Theory: 01 Hr/week, Practical: 02 Hrs/Week	<b>Credits: 1-0-1</b> In-Semester Examination -II: 10 Marks Teacher Assessment: 15 Marks
<b>Prerequisite</b>	Understanding of the Concept of Environment.
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. To study the environment and ecosystems.</li><li>2. To study different types of natural resources.</li><li>3. Knowledge and concept of biodiversity and its conservation.</li><li>4. Basic knowledge and concept of causes, effects, and control of different types of environmental pollution.</li><li>5. To study population growth and its impact on the environment</li></ol>
<b>Unit-I</b>	<b>Introduction to environmental studies and natural resources:</b> Definition, scope and importance and need for public awareness. Natural resources: Forest resources: Use and over-exploitation, deforestation. Timber extraction. Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams benefits and problems. Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources. <p style="text-align: right;">(02 Hrs)</p>
<b>Unit-II</b>	<b>Food, energy, and land resources:</b> Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity. Energy resources: Growing energy needs, renewable and non-renewable energy sources, and use of alternate energy sources. Land resources: Land as a resource, land degradation, man-induced landslides, soil erosion, and desertification. <p style="text-align: right;">(02 Hrs)</p>
<b>Unit-III</b>	<b>Ecosystems:</b> Concept of an ecosystem. Structure and function of an ecosystem. Producers, consumers, and decomposers. Energy flow in the ecosystem. Ecological succession. Food chains, food webs, and ecological pyramids. Introduction, types, characteristic features, structure, and function of the following ecosystems: Forest ecosystem, Grassland ecosystem, Desert ecosystem, and Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries). <p style="text-align: right;">(02 Hrs)</p>
<b>Unit-IV</b>	<b>Biodiversity and its conservation:</b> Introduction – Definition: genetic, species, and ecosystem diversity. Biogeographical classification of India. Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts. Endangered and endemic species of India Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity. <p style="text-align: right;">(02 Hrs)</p>

Master Copy

<b>Unit-V</b>	<b>Environmental Pollution:</b> Definition, Cause, effects, and control measures of Air pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, nuclear hazards, Role of an individual in the prevention of pollution. (03 Hrs)				
<b>Unit-VI</b>	<b>Social Issues and the Environment:</b> From Unsustainable to sustainable development. Urban problems related to energy. Climate change, global warming, acid rain, ozone layer depletion Environment Protection Act. Public awareness. (02 Hrs)				
<b>List of Exercise</b>	<ol style="list-style-type: none"> <li>1. Study of a local hilly area to document environmental assets.</li> <li>2. Study of a forest area as an environmental asset.</li> <li>3. Study assignment on sustainable development goal, 'No Hunger'.</li> <li>4. Case study on landslide.</li> <li>5. Poster making on food chain, food web and ecological pyramids.</li> <li>6. Study of hotspots of biodiversity in India as a mega diversity nation.</li> <li>7. Assignment on causes, effects and control measures of urban and industrial wastes.</li> <li>8. Working out a plan of roof top rainwater harvesting for a house.</li> <li>9. Case study on resettlement and rehabilitation of people because of developmental activities such as dams, mining, etc.</li> <li>10. Visit to local polluted site</li> </ol>

## Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III)

Course Category: **ELC**

Course Code: ELC221

Course: **Community Engagement Project**

Teaching Scheme: Practical: 04 Hrs/Week

**Credits: 0-0-2**

Teacher Assessment: 25 Marks

<b>Course Description</b>	The "Community Engagement Project" course is designed to provide students with field-based learning experiences that integrate their theoretical knowledge of major discipline of engineering with real-life socio-economic issues. Students will engage in projects that address community needs, enhancing their understanding of the role of engineering in society and developing their problem-solving and communication skills.
<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. To expose students to socio-economic issues and challenges in society.</li> <li>2. To apply theoretical knowledge to develop practical solutions to real-life problems.</li> <li>3. To enhance students' communication, teamwork, and project management skills.</li> <li>4. To foster a sense of social responsibility and ethical awareness among students.</li> </ol>
<b>Learning Outcomes</b>	<p>By the end of the course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Identify and analyze socio-economic issues in the community.</li> <li>2. Apply engineering principles to propose and implement solutions to community problems.</li> <li>3. Work effectively in teams to achieve project goals.</li> <li>4. Communicate project findings and solutions effectively in written and oral forms.</li> <li>5. Reflect on the social impact of their projects and their role as engineers in society.</li> </ol>
<b>Implementation guidelines</b>	<ol style="list-style-type: none"> <li>1. A group of four students, under the guidance of faculty mentors, conduct a Socioeconomic Survey of the nearby area/ habitation. They will interact with people and conduct the survey using a structured questionnaire.</li> <li>2. The group of students will choose a topic related to their subject area relevant to their major discipline and conduct a Project which includes data collection and analysis and a conclusion/ solution on a selected problem.</li> <li>3. Students should submit a project report duly signed by the mentor.</li> <li>4. Assessment should be done by a mentor continuously (Rubrics based)</li> </ol>
<b>Assessment Methodology</b>	<ol style="list-style-type: none"> <li>1. <b>Field Work and Engagement (40%)</b> <ul style="list-style-type: none"> <li>o Quality and effectiveness of community engagement.</li> <li>o Depth of data collection and analysis.</li> <li>o Ability to identify and understand community issues.</li> </ul> </li> <li>2. <b>Project Implementation (30%)</b> <ul style="list-style-type: none"> <li>o Creativity and feasibility of proposed solutions.</li> <li>o Effectiveness of implementation.</li> <li>o Adaptation and problem-solving during implementation.</li> </ul> </li> <li>3. <b>Reports and Documentation (20%)</b> <ul style="list-style-type: none"> <li>o Documentation of data, process, and outcomes.</li> </ul> </li> </ol>

**Master Copy**

	<ul style="list-style-type: none"> <li>○ Reflection on personal learning and project impact.</li> </ul> <p><b>4. Presentation (10%)</b></p> <ul style="list-style-type: none"> <li>○ Clarity and effectiveness of oral presentation.</li> <li>○ Ability to communicate project findings and solutions.</li> <li>○ Engagement with audience and response to questions.</li> </ul>
--	--

### Rubrics for Assessment:

Criteria	Excellent (5)	Good (4)	Satisfactory (3)	Needs Improvement (2)	Inadequate (1)
<b>Field Work and Engagement</b>	Thorough and insightful engagement with the community. Extensive data collection and deep understanding of issues.	Effective engagement with the community. Adequate data collection and good understanding of issues.	Satisfactory engagement with the community. Basic data collection and understanding of issues.	Limited engagement with the community. Incomplete data collection and understanding of issues.	Minimal or no engagement with the community. Poor or no data collection and understanding of issues.
<b>Project Implementation</b>	Innovative and highly feasible solutions. Effective implementation with positive impact.	Creative and feasible solutions. Good implementation with noticeable impact.	Basic but feasible solutions. Satisfactory implementation with some impact.	Limited creativity in solutions. Ineffective implementation with minimal impact.	No feasible solutions. Poor or no implementation with no impact.
<b>Reports and Documentation</b>	Comprehensive and clear reports. Thorough documentation of process and outcomes. Reflective insights.	Clear and detailed reports. Good documentation of process and outcomes. Some reflective insights.	Adequate reports. Basic documentation of process and outcomes. Limited reflective insights.	Incomplete or unclear reports. Inadequate documentation of process and outcomes. Minimal reflective insights.	Poor or no reports. No documentation of process and outcomes. No reflective insights.
<b>Presentation</b>	Highly effective and engaging presentation. Clear communication of findings and solutions.	Effective presentation. Clear communication of findings and solutions.	Satisfactory presentation. Basic communication of findings and solutions.	Unclear or disorganized presentation. Limited communication of findings and solutions.	Poor or no presentation. Unable to communicate findings and solutions.

### Suggested Reading Materials and Resources:

- Book:** "The Community Engagement Professional in Higher Education" by Lina D. Dostilio
- Web Resources:** IEEE Xplore Digital Library for research papers on community engagement projects. Also, refer websites of NGOs and community organizations for case studies and project ideas.

<b>Faculty of Science &amp; Technology</b> <b>Syllabus of Second Year B.Tech. (All Branches) (Semester III)</b>	
<p>Course Category: <b>Seminar</b> Course Code: SEM222 Course: <b>Seminar</b> Teaching Scheme: Practical: 02 Hrs/Week</p>	<p><b>Credits: 0-0-1</b> Teacher Assessment: 25 Marks</p>
<b>Course Description</b>	<p>The Seminar course is designed to develop students' research, presentation, and communication skills through the preparation and presentation of seminars. The topics for the seminars will be related to the <b>Open Elective-1 Course chosen</b> by the students. Under the supervision of faculty, students will engage in independent research, organize their findings, and present them effectively to their peers and faculty members. This course aims to enhance students' ability to communicate complex ideas clearly and confidently, fostering a deeper understanding of their elective subjects.</p>
<b>Assessment Methodology</b>	<p>The assessment for the Seminar course will be based on continuous evaluation of the following components:</p> <ol style="list-style-type: none"><li>1. <b>Topic Selection and Proposal (20%)</b><ul style="list-style-type: none"><li>○ Relevance and appropriateness of the selected topic.</li><li>○ Clarity and feasibility of the seminar proposal.</li></ul></li><li>2. <b>Literature Review (20%)</b><ul style="list-style-type: none"><li>○ Depth and thoroughness of the literature review.</li><li>○ Use of credible and relevant sources.</li></ul></li><li>3. <b>Seminar Outline and Content Development (20%)</b><ul style="list-style-type: none"><li>○ Logical organization and structure of the seminar.</li><li>○ Clarity and coherence of the content.</li><li>○ Integration of theoretical concepts with practical examples.</li></ul></li><li>4. <b>Presentation Skills (20%)</b><ul style="list-style-type: none"><li>○ Clarity, confidence, and engagement during the presentation.</li><li>○ Effective use of visual aids and multimedia.</li><li>○ Ability to handle questions and engage in discussion.</li></ul></li><li>5. <b>Seminar Report (20%)</b><ul style="list-style-type: none"><li>○ Quality and thoroughness of the written seminar paper.</li><li>○ Proper formatting, citations, and adherence to guidelines.</li></ul></li></ol>
	<p><b>Guidelines for Implementation:</b></p> <ol style="list-style-type: none"><li>1. <b>Supervision and Guidance:</b><ul style="list-style-type: none"><li>○ Faculty members will supervise the seminar preparation and presentation process.</li><li>○ Regular meetings will be scheduled for discussing progress and providing feedback.</li></ul></li><li>2. <b>Topic Selection:</b><ul style="list-style-type: none"><li>○ Students will select topics related to their open elective courses.</li><li>○ Topics must be approved by the supervising faculty.</li></ul></li><li>3. <b>Literature Review:</b><ul style="list-style-type: none"><li>○ Students will conduct a thorough literature review using credible academic sources.</li><li>○ An annotated bibliography will be prepared as part of the assessment.</li></ul></li><li>4. <b>Seminar Preparation:</b><ul style="list-style-type: none"><li>○ Students will develop a detailed outline and structure for their seminar.</li></ul></li></ol>

**Master Copy**

	<ul style="list-style-type: none"> <li>○ Visual aids and multimedia tools will be used to enhance the presentation.</li> </ul> <p><b>5. Presentation:</b></p> <ul style="list-style-type: none"> <li>○ Students will present their seminars to peers and faculty.</li> <li>○ Each presentation will be followed by a Q&amp;A session.</li> </ul> <p><b>6. Final Submission:</b></p> <ul style="list-style-type: none"> <li>○ A written seminar report summarizing the research and presentation will be submitted.</li> <li>○ Proper formatting and citation guidelines must be followed.</li> </ul>
--	--

### Rubrics for Assessment:

Criteria	Excellent (5)	Good (4)	Satisfactory (3)	Needs Improvement (2)	Inadequate (1)
<b>Topic Selection and Proposal</b>	Highly relevant and innovative topic. Clear and feasible proposal.	Relevant and clear topic. Feasible proposal with minor improvements needed.	Adequate topic. Proposal is clear but lacks innovation.	Topic relevance is questionable. Proposal lacks clarity and feasibility.	Irrelevant or inappropriate topic. Poor or no proposal.
<b>Literature Review</b>	Comprehensive and insightful review. Uses a wide range of credible sources.	Thorough review with mostly credible sources.	Adequate review with some credible sources. Basic synthesis of information.	Limited review with few credible sources. Weak synthesis and analysis.	Poor or no review with irrelevant or no credible sources. No synthesis or analysis.
<b>Seminar Outline and Content Development</b>	Clear, logical, and well-organized outline. Content is comprehensive and well-developed.	Good outline and organization. Content is clear with minor gaps.	Adequate outline with some organization. Content covers basic points.	Poorly organized outline. Content is incomplete or lacks coherence.	No clear outline. Content is disorganized and lacks substance.
<b>Presentation Skills</b>	Engaging, clear, and confident presentation. Effective use of visual aids. Handles Q&A expertly.	Clear and confident presentation. Good use of visual aids. Handles Q&A adequately.	Adequate presentation with some clarity issues. Basic use of visual aids. Manages Q&A with difficulty.	Unclear or hesitant presentation. Limited use of visual aids. Struggles with Q&A.	Poor or no presentation. Ineffective or no use of visual aids. Unable to handle Q&A.
<b>Seminar Report</b>	Thorough and well-written Report. Proper formatting and citations. Reflects deep understanding.	Good Report with minor errors. Mostly proper formatting and citations. Shows good understanding.	Adequate Report with some errors. Basic formatting and citations. Shows basic understanding.	Poorly written Report with many errors. Inadequate formatting and citations. Limited understanding.	No or very poorly written Report. Incorrect or no formatting and citations. Lacks understanding.

<b>Faculty of Science &amp; Technology</b> <b>Syllabus of Second Year B.Tech. (Artificial Intelligence and Data Science) (Semester IV)</b>	
<p>Course Category: <b>PCC</b> Course Code: AID251 Course: <b>Operating System</b> Teaching Scheme: Theory: 03 Hrs/week</p>	<p><b>Credits: 3-0-0</b> In Semester Examination-I: 15 Mark In Semester Examination-II: 15 Marks Continuous Internal Evaluation: 10 Marks Teacher Assessment: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs</p>
<b>Prerequisite</b>	C Programming, Data Structures, Computer Organization
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. To learn the fundamentals of Operating System.</li><li>2. To study different components of OS.</li><li>3. To understand an overview of the different Types and Structures of OS.</li><li>4. To provide understanding of important system resources and their management policies</li></ol>
<b>Unit-I</b>	<p><b>Introduction</b> Operating System Objectives and Functions: The OS as a User/Computer Interface, OS as a resource manager. Evolution of Operating system: Batch System, multiprogramming, time sharing, multitasking, distributed, handheld Computer System, Embedded OS, Real Time, Smart Card OS. Operating System Structure: Monolithic Systems, layered Systems. Micro Kernels, Exokernels. System Calls and Shell.</p> <p style="text-align: right;"><b>(06 Hrs.)</b></p>
<b>Unit-II</b>	<p><b>Process Management</b> Process concept. Process states (two state, five state), Process Description, PCB.CPU scheduling- scheduling criteria, Scheduling Algorithms. Thread: Process and "threads, Thread functionality, User level and Kernel level threads. Process Synchronization Principle of concurrency, Race condition. Critical Sections/Regions Mutual Exclusion, Sleep and wakeup, Producer consumer problem, Semaphore, Monitors, Message Passing. Dining Philosopher Problem, Readers, and writers' problem.</p> <p style="text-align: right;"><b>(07 Hrs.)</b></p>
<b>Unit-III</b>	<p><b>File Systems</b> Overview: File, File Management System, File System Architecture, File Management Functions. File Organization and access, File System Layout. File Directories, File Sharing. Secondary Storage Management: File Allocation, Disk space management. File System Consistency and Performance.</p> <p style="text-align: right;"><b>(07 Hrs.)</b></p>
<b>Unit-IV</b>	<p><b>Memory Management</b> Memory Management Requirements, Relocation, Protection, Sharing, Logical Organization, Physical Organization. Memory Partitioning: Fixed, Dynamic Partitioning, Relocation Fragmentation, Swapping. Managing free Memory: Memory management with bitmap, linked list. Paging: Basic Method, Structure of pageTable. Segmentation: Basic Method. Virtual Memory: Demand Paging, Page replacement Algorithms- optimal, FIFO, LRU, Allocation of Frames, Thrashing.</p> <p style="text-align: right;"><b>(07 Hrs.)</b></p>

# Maharashtra Institute of Technology

Chhatrapati Sambhajinagar  
(An Autonomous Institute)

<b>Unit-V</b>	<b>Device Management</b> Principles of I/O Hardware: I/O devices, Device Controllers. Principle of I/O software, I/O Software Layers, Disk: Disk hardware -Magnetic CDs, DVDs Disk, RAID, Disk Formatting, Disk Scheduling Algorithms, Clocks. <b>(06 Hrs.)</b>				
<b>Unit-VI</b>	<b>Deadlock and Case study</b> Deadlock, System model, Characterization, Deadlock Prevention, Deadlock avoidance - Bankers Algorithm for single and multiple resources, Deadlock detection and recovery, Case study of Window 10- History of Windows, Case study of Linux- History of Linux. <b>(06 Hrs.)</b>

<b>Faculty of Science &amp; Technology</b> <b>Syllabus of Second Year B.Tech. (All Branches) (Semester IV)</b> <b>Open Elective-2 offered by the Department of Agricultural Engineering</b>	
<b>Course Category:</b> OEC <b>Course Code:</b> OEC291A <b>Course:</b> Smart Agriculture Practices <b>Teaching Scheme:</b> Theory: 02 Hrs./week	<b>Credits:</b> 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15 Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
<b>Prerequisite</b>	Fundamentals of agriculture and basic sciences knowledge required
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. To understand the concept and importance of smart agriculture.</li><li>2. To learn about the technologies and practices used in smart agriculture.</li><li>3. To explore the impact of smart agriculture on productivity and sustainability.</li><li>4. To develop practical skills in using smart agriculture technologies.</li></ol>
<b>Unit-I</b>	<b>Introduction to Smart Agriculture:</b> Definition and scope of smart agriculture Benefits and challenges of smart agriculture: productivity, reduced resource wastage (water, fertilizers, etc.), improved decision-making through data analysis, and enhanced sustainability. Challenges include high initial costs, technological complexity, and the need for training and education. <p style="text-align: right;">(04 Hrs)</p>
<b>Unit-II</b>	<b>Data Analytics in Agriculture:</b> Basics of data analytics. Data analytics involves the process of collecting, processing, and analyzing data to extract useful information and insights. <p style="text-align: right;">(04 Hrs)</p>
<b>Unit-III</b>	<b>Precision Agriculture:</b> Principles and components of precision agriculture. Technologies used in precision agriculture: GPS for location-based data, GIS for spatial analysis, and remote sensing for monitoring crop health and environmental conditions. Precision agriculture applications: Variable rate technology allows for the precise application of inputs (fertilizers, pesticides) based on localized conditions, and site-specific management tailors farming practices to the specific needs of different areas within a field. <p style="text-align: right;">(05 Hrs)</p>
<b>Unit-IV</b>	<b>Smart Irrigation Systems:</b> Introduction to smart irrigation: Benefits and challenges of smart irrigation: Benefits include water savings, improved crop yields, and reduced labor costs. Challenges include high initial costs and the need for proper maintenance and monitoring. <p style="text-align: right;">(04 Hrs)</p>

(An Autonomous Institute)

<b>Unit-V</b>	<p><b>Smart Crop Management: Crop monitoring and management practices:</b> Smart agriculture technologies such as drones, sensors, and data analytics are used to monitor crop health, detect diseases and pests, and optimize crop management practices. <b>Crop health monitoring using smart technologies:</b> Sensors and drones can be used to monitor crop health indicators such as leaf color, temperature, and humidity. <b>Crop modeling and forecasting:</b> Data from sensors and other sources can be used to develop crop models that predict yields, water requirements, and optimal planting times. These models help farmers make informed decisions about crop management.</p> <p style="text-align: right;">(05 Hrs)</p>				
<b>Unit-VI</b>	<p><b>Case Studies and Practical Applications:</b> Real-world examples of smart agriculture practices: Case studies from around the world showcase how smart agriculture technologies are being used to improve farming practices, increase yields, and enhance sustainability.</p> <p style="text-align: right;">(04 Hrs)</p>

## Faculty of Science & Technology

### Syllabus of Second Year B.Tech. (All Branches) (Semester IV)

#### Open Elective-2 offered by the Department of Civil Engineering

<b>Course Category:</b> OEC <b>Course Code:</b> OEC291B <b>Course:</b> Solid Waste Management <b>Teaching Scheme:</b> Theory: 02 Hrs./week	<b>Credits:</b> 2-0-0 <b>In-Semester Examination-I:</b> 15 Marks <b>In-Semester Examination-II:</b> 15Marks <b>Teacher Assessment:</b> 10 Marks <b>Continuous Internal Evaluation:</b> 10 Marks <b>End Semester Examination:</b> 50 Marks <b>End Semester Examination (Duration):</b> 02 Hrs.
<b>Prerequisite</b>	Basic knowledge of concepts of economics.
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. Understanding the principles and functional elements of SWM</li><li>2. To know the way of generation of different kind of solid waste.</li><li>3. Effectively handling and shortening of waste. for recycle and energy transformation</li><li>4. Adopting suitable and efficient method of processing to get minimum disposable matter</li><li>5. Choosing the appropriate method of disposal and essential requirements</li><li>6. Handling hazardous Waste and getting it stabilized</li></ol>
<b>Unit-I</b>	<b>Introduction to Solid Waste Management:</b> need and objectives, waste management hierarchy, functional elements, environmental impact of mismanagement. solid waste: sources, types, composition, sampling and characteristics quantities, physical, chemical and biological properties. <p style="text-align: right;">(04 Hrs)</p>
<b>Unit-II</b>	<b>Generation of Solid Waste:</b> factors affecting, storage and collection: general considerations for waste storage at source, types of collection systems, transfer station: meaning, necessity, transportation of solid waste: means and methods, routing of vehicles. <p style="text-align: right;">(04 Hrs)</p>
<b>Unit-III</b>	<b>Segregation &amp; Material Recovery:</b> objectives, stages of segregation, sorting operations, guidelines for sorting for materials recovery, e-waste management, biomedical waste management. <p style="text-align: right;">(05 Hrs)</p>
<b>Unit-IV</b>	<b>Waste Processing Technologies:</b> composting, thermal conversion technologies incineration, treatment of biomedical wastes. energy recovery from solid waste: parameters affecting energy recovery, bio-methanation, fundamentals of thermal processing, pyrolysis, incineration, advantages and disadvantages of various technological options. <p style="text-align: right;">(05 Hrs)</p>
<b>Unit-V</b>	<b>Disposal Terminology:</b> origin of domestic solid wastes, the quantity of refuse & transportation of refuse, the economics of refuse collection. solid waste in industries, agricultural waste – its effect on the environment. solid waste handling methods, treatment & disposal of solid wastes. sanitary landfills leachate and latest methods. integrated solid waste management. <p style="text-align: right;">(04 Hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester IV)	
Course Category: <b>VSEC</b> Course Code: VSE271 Course: <b>Professional English</b> Teaching Scheme: Theory: 01 Hr./week Practical: 02 Hrs./Week	<b>Credits: 1-0-1</b> In-Semester Examination-II: 10 Marks Teacher Assessment: 15 Marks
<b>Prerequisite</b>	Knowledge of the English Language, Knowledge of LSRW techniques
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. To understand the concept of effective communication.</li><li>2. To make use of the principles of business etiquette in professional behavior</li><li>3. To utilize different strategies of reading and listening for effective communication</li><li>4. To understand various forms of communication and demonstrate knowledge of surroundings during different communication situations.</li><li>5. To construct an appropriate format of business documents and build a positive image as an effective communicator.</li><li>6. To apply professional etiquette in professional life and inculcate the habit of standard behavior.</li></ol>
<b>Unit-I</b>	<b>Basics of Communication:</b> Communication Process and its elements, verbal and nonverbal communication, barriers of communication and strategies to overcome them, characteristics of effective communication. (02 Hrs)
<b>Unit-II</b>	<b>Interpersonal Skills:</b> Teamwork and team building: Team formation, team dynamics, leadership styles, Time Management: concept, strategies, Stress Management: types and techniques. (02 Hrs)
<b>Unit-III</b>	<b>Receptive Skills of Language:</b> Listening Skills: Purpose and importance of Listening, different types of listening, barriers & strategies of effective listening <b>Reading Skills:</b> Purpose and importance, types, barriers & strategies of reading. (03 Hrs)
<b>Unit-IV</b>	<b>Oral Communication:</b> Group Discussion, Interview techniques, public speaking. (02 Hrs)
<b>Unit-V</b>	<b>Writing Skills:</b> Business Letters, drafting an email, Writing Job Applications Resume Preparation, Writing reports. (02 Hrs)

**Faculty of Science & Technology**  
**Syllabus of Second Year B.Tech. (All Branches) (Semester IV)**

Course Category: **AEC**  
Course Code: AEC272  
Course: **Personality and Leadership Development Skills**  
Teaching Scheme: Practical: 04 Hrs./Week

Credits: 0-0-2  
Teacher Assessment: 25 Marks

**Prerequisite** Nil

**Objectives**

1. Equip engineering graduates with the essential soft skills and leadership skills necessary to succeed in the professional world.
2. Empower students to effectively market themselves through resume building, cover letter writing, and professional networking.
3. Prepare students for the job search process by providing strategies for job market research, effective job search techniques, and interview preparation.
4. Foster a mindset of continuous learning and career development to ensure long-term success and adaptability in the evolving engineering landscape.
5. Prepare the student to appear for Aptitude test as a part of the campus recruitment process

**List of Practical**

**Activities to be performed in each session (session duration - 2 hrs.)**

1. Skills Assessment: Students assess their hard and soft skills, discuss within groups, and create a skills matrix.
2. Problem-Solving Challenge: Teams brainstorm solutions to a complex engineering problem, present their solutions, and discuss their decision-making process.
3. Industry Trends Research: Students research industry trends and create visual presentations summarizing their findings.
4. Job Profile Analysis: In pairs, students analyse job profiles, compare and contrast them, and present their analysis to the class.
5. Goal Setting: Students set SMART goals, create action plans, and receive feedback from peers.
6. Resume Building Workshop: Students learn about resume writing best practices, review sample resumes, and draft their own resumes with guidance and feedback.
7. LinkedIn Profile Development: Students update their LinkedIn profiles, receive peer feedback, and ensure completeness and professionalism.
8. Elevator Pitch Competition: Students craft and deliver elevator pitches, compete for the most compelling presentations, and receive feedback.
9. Internship Application Workshop: Students draft effective internship applications, review each other's materials, and receive guidance on researching opportunities.
10. Mock Interview Marathon: Students participate in mock interviews, rotate through different scenarios, and receive feedback on their interview skills.

11. Hackathon Preparation Workshop: Students learn about hackathons, form teams, brainstorm project ideas, and begin planning for participation.
12. Project Competition Bootcamp: Students prepare for project competitions, form teams, brainstorm ideas, and develop prototypes or proposals for submission.
13. Team Building Challenge: Split the batch into smaller teams for collaborative problem-solving tasks that emphasize communication and teamwork.
14. Mock Leadership Scenarios: Assign students roles in various leadership scenarios to practice decision-making, delegation, conflict resolution, and empathy.
15. Community Service Project Planning: Guide students in planning a community service project, allowing them to take on different leadership roles and develop project management skills while addressing real-world issues.
16. Students will learn and solve problems related to fundamental numerical concepts, including the number system, LCM, HCF, and divisibility.
17. In this session, students will focus on percentages and ratios, learning to solve problems related to these concepts.
18. Students will delve into the application of time and work principles, solving problems that require understanding and application of these concepts.
19. This session will concentrate on profit and loss calculations, with students learning to solve related problems effectively.
20. Students will tackle problems related to determining ages, applying appropriate mathematical techniques to arrive at solutions.
21. Geometric concepts will be the focus of this session, with students learning about shapes, their properties, and perimeter calculations.
22. Arithmetic concepts like progressions and equations will be covered in this session, with students practicing solving problems based on these topics.
23. Students will review and consolidate their understanding of average and decimal fraction concepts, solving related problems to reinforce learning.
24. This session will cover the intricacies of calendar and clock problems, with students learning to solve such problems effectively.
25. Students will learn and solve problems based on word patterns and number series, honing their pattern recognition skills.
26. Logical reasoning basics will be covered in this session, with students learning and solving problems related to blood relations and coding-decoding.
27. Direction sense and symbols will be the focus of this session, with students learning to solve problems based on these concepts effectively.
28. Advanced logical reasoning skills will be developed in this session, with students tackling problems related to syllogism and logical puzzles.
29. Visual reasoning concepts will be explored in this session, with students learning to solve problems based on visual patterns effectively.
30. In the final session, students will engage in a comprehensive review of all topics covered in the course and participate in a mock test simulation to assess their understanding and readiness for placement exams.

<b>Faculty of Science &amp; Technology</b> <b>Syllabus of Second Year B.Tech. (Artificial Intelligence and Data Science) (Semester IV)</b>	
<b>Course Category:</b> PCC <b>Course Code:</b> AID273 <b>Course:</b> Object Oriented Programming in Java Laboratory <b>Teaching Scheme:</b> Practical: 02 Hrs/week	<b>Credits:</b> 0-0-1 <b>Teacher Assessment:</b> 25 Marks <b>ESE/Oral:</b> 25 Marks
<b>Objectives</b>	To implement object-oriented concepts using Java language
<b>List of Practical</b>	<ol style="list-style-type: none"><li>1. Write a program that inputs a word and a sentence. Find the given word in the sentence entered.</li><li>2. Write a program to store five student's marks along with roll number in an array. Display marks of a particular roll number.</li><li>3. Write a class Stack to push number, pop number and also to check stack empty or full. (Use OOPs concepts and constructor overloading to assign default size of stack to 5 or user can change the stack size while creating object)</li><li>4. Create a class, Bank Account, with fields account Number, account Holder Name, balance and interest Rate and a method deposit() that adds an amount to the balance. Create a subclass Savings Account that extends Bank Account and adds a field minimum Balance and a method withdraw() that subtracts an amount from the balance. Create a subclass Fixed Deposit Account that extends Savings Account and adds a field term and a method get Interest() that returns the interest earned on the account. Create an object of the Bank Account class and call the deposit() method. Create an object of the Savings Account class and call the deposit() and withdraw() methods. Create an object of the Fixed Deposit Account class and call the deposit().</li><li>5. Write a program to implement compile time polymorphism.</li><li>6. Write a program to implement run time polymorphism.</li><li>7. Write a program to demonstrate the use of interfaces and packages.</li><li>8. Write a program to handle Run Time Exceptions in Java</li><li>9. Write a program to throw Negative Number Exception (which is a user defined exception) if user enters a negative number as input.</li><li>10. Write a program to demonstrate multithreading in Java.</li></ol>

<b>Faculty of Science &amp; Technology</b> <b>Syllabus of Second Year B.Tech. (Artificial Intelligence and Data Science) (Semester IV)</b>	
<p>Course Category: <b>PCC</b> Course Code: AID274 Course: <b>Python for Data Science Laboratory</b> Teaching Scheme: Practical: 02 Hrs/week</p>	<p><b>Credits: 0-0-1</b> Teacher Assessment: 25 Marks ESE/Oral: 25 Marks</p>
<b>Objectives</b>	<ol style="list-style-type: none"><li>1. To use core Python functionalities to work with various data types, perform essential operations.</li><li>2. To write basic scripts to automate data processing tasks.</li><li>3. To acquire data for cleaning and analyzing.</li><li>4. To present insights through visualizations and building a basic workflow.</li></ol>
<b>List of Practical</b>	<ol style="list-style-type: none"><li>1. Use sequence data types and their associated operations in Python<ol style="list-style-type: none"><li>a) Strings</li><li>b) Lists</li><li>c) Arrays</li><li>d) Tuples</li><li>e) Dictionary</li><li>f) Sets</li><li>g) Range</li></ol></li><li>2. Data Ingestion and Cleaning: Acquire data and prepare it for analysis</li><li>3. Data Wrangling with pandas: Manipulate and transform data to suit the analysis needs.</li><li>4. Numerical Computation with NumPy: Perform different computations using NumPy library.</li><li>5. Data Visualization with Matplotlib: Data visualization on a dataset using matplotlib and seaborn libraries<ol style="list-style-type: none"><li>a) Scatter plot</li><li>b) Line plot</li><li>c) Bar plot</li><li>d) Histogram</li><li>e) Box plot</li><li>f) Pair plot</li></ol></li><li>6. Implementing Web Scraping in Python with BeautifulSoup.</li><li>7. Data Preprocessing for Machine Learning: Prepare the data to use in machine learning models.</li><li>8. Exploratory Data Analysis (EDA) with Seaborn: Create advanced visualizations specifically for data exploration using Seaborn.</li><li>9. Building a Simple Data Science Pipeline: Integrate all learned techniques in previous labs into a complete workflow.</li><li>10. Implement version control using Git.</li></ol>

## Brief about - Honor and Double Minor Degree program

As per the NEP 2020 guidelines, **Honor Degree** courses are offered by Department (Major Discipline), whereas the Minor Degree courses (referred as **Double Minor**) are offered by another department. Honor Degree or Double Minor Degree is **Optional**. The students those who fulfill the eligibility norms can enroll for it. The Table 1 and 2 give the list of such programs.

**Table 1: Honours Degree Programs**

Sr. No.	Name of Honours Degree Program	Offered by
1	Smart Agritech	Agricultural Engineering
2	Green Technology and Sustainable Environment	Civil Engineering
3	Digital Media	Computer Science and Design
4	Cloud Computing	Computer Science and Engineering
5	Internet of Things	Electronics and Computer Engineering
6	Electric Vehicles	Electrical Engineering
7	Generative AI	Artificial Intelligence and Data Science
8	Robotics and Automation	Mechanical Engineering
9	Polymeric Materials	Plastic and Polymer Engineering

**Table 2: Minor Degree Programs**

Sr. No.	Name of Minor Degree Program	Offered by
1	Advanced Agricultural Engineering	Agricultural Engineering
2	Sustainable Infrastructure and Smart Cities	Civil Engineering
3	Design Engineering	Computer Science and Design
4	Cyber Security	Computer Science and Engineering
5	Data Science	Electronics and Computer Engineering
6	Sustainable Energy Engineering	Electrical Engineering
7	Data Analytics	Artificial Intelligence and Data Science
8	Mechanical Engineering Systems and Automation	Mechanical Engineering
9	Polymeric Products and Project Economics	Plastic and Polymer Engineering

**Student can opt for either Honor or Minor degree program at a time and not the both.**  
The course curriculum and guidelines are given in a separate Information Booklet, available at the Department.

Dr. Ajij D. Sayyed, Dean (Academic)
