Open Elective-1 Course Basket:

Course Code	Course Title	Name of Department offering the Course	^S Seminar (SEM222)
OEC241A	Introduction to Sociology	Basic Sciences & Humanities	Seminar to be prepared and presented on the topics related to course opted as Open Elective -1.
OEC241B	Technology for Rural Development	Civil Engineering	
OEC241C	Professional Ethics and Corporate Social Responsibility	Civil Engineering	
OEC241D	Constitution of India	Electrical Engineering	
OEC241E	Electrical, Fire and Vehicle Safety	Electrical Engineering	
OEC241F	Emotional Intelligence	Mechanical engineering	

As per the NEP 2020 guidelines, **Honor Degree** courses are offered by Department (**Major Discipline**), whereas the Minor Degree courses (referred as **Double Minor**) are offered by **another** department. **Honor Degree or Double Minor Degree is Optional**. The students those who fulfill the eligibility norms can enroll for it. The course curriculum and guidelines are given in a **separate Information Booklet, available at the Department.**

Faculty of Science & Technology Syllabus of Second Year B. Tech (Civil Engineering) (Semester III)	
Course Category: PCC Course Code: CED201 Course: Mathematics for Civil Engineering Teaching Scheme: Theory- 3 Hrs./week	Credits: 3-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 2 Hrs.
Prerequisite	Students require the knowledge of all basic concepts related to Statistics, Probability & Calculus.
Objectives	i. To develop skills and create interest to use mathematics in Engineering & Technology. ii. To understand the importance of Statistics, Probability Distributions & Calculus in Engineering & technology. iii. To solve various types of engineering problems using differential equations.
Unit-I	Linear Differential Equations: Solution of n^{th} order linear differential equation with constant coefficients: Complementary function, Particular integral- Short method and Method of Variation of Parameters (09 Hrs.)
Unit-II	Probability Distributions: Binomial distribution, Poisson distribution, Normal distribution (05 Hrs.)
Unit-III	Statistics: Measures of central tendency: Mean Median, Quartiles and Mode. Measures of dispersion: Quartile deviation, Mean deviation, Standard deviation, Coefficient of variation. (07Hrs.)
Unit-IV	Vector Differentiation: Differentiation of vectors, Scalar and Vector point functions, Gradient of a scalar point function, Directional derivative, Divergence and Curl of vector point function, Irrotational and Solenoidal vector fields (06Hrs.)
Unit-V	Vector Integration: Line integral, Work done in a force field, Surface integral, Green's theorem, Stokes theorem. (06Hrs.)
Unit-VI	Application of Partial Differential Equations: Solution of partial differential equation by method of separation of variables, Applications to i. Vibration of a string (Wave equation) (without proof) ii. One dimensional heat flow equation (Diffusion equation) (without proof)

iii. Two dimensional heat flow equation under steady state (Diffusion equation) (without proof)

(06Hrs.)

Faculty of Science & Technology Syllabus of Second Year B. Tech (Civil Engineering) (Semester III)	
Course Category: PCC Course Code: CED202 Course: Surveying and Leveling Teaching Scheme: Theory- 3 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 2 Hrs.
Prerequisite	Students need to have knowledge of Basics of Civil Engineering
Objectives	Students will be able 1. To understand the basic concepts of surveying in civil engineering. 2. To study the basics of linear and angular measurement. 3. To study the significance of plane table surveying in plan making. 4. To know the basics of levelling and theodolite survey in elevation and angular measurements. 5. To get introduced to modern advanced surveying techniques involved such as Total station.
Unit-I	Introduction- Basic definitions, principle and uses of surveying, concept of scale, difference between map and plan, classification of surveying, introduction of chaining and traversing, accessories for linear measurement, well-conditioned and ill-conditioned triangle, instruments for measuring right angles, Types of Errors. Errors and corrections in tape measurements, ranging of lines, direct and indirect methods of ranging, Field book, entries, Conventional symbols. (04Hrs)
Unit-II	Compass Traversing: Introduction and purpose, principles of compass surveying, concept of magnetic bearings, use of prismatic compass, Local attraction, magnetic declination, and Temporary adjustment of prismatic compass. Problems on bearing, interior angle, Magnetic declination and local attraction. (04 Hrs)
Unit-III	Plane Table Survey: Principle, Equipment required for plane table Survey, uses, advantages, disadvantages and errors in plane table surveying; Methods of plane table Survey- radiation, intersection & resection (mechanical & three point problem) (04Hrs)
Unit-IV	Leveling: Introduction to leveling, & basic terms, types of leveling Instruments, , types of leveling fundamental lines of dumpy level, temporary and permanent adjustments, methods of leveling curvature and fraction corrections, distance to the visible horizon. Contouring: Definition, characteristics, uses, types, methods of locating contours, interpolation of contours, use of topo-sheets. (06Hrs)

Maharashtra Institute of Technology

Chhatrapati Sambhajanagar
(An Autonomous Institute)

Unit-V	Theodolite Traversing: Definitions of different terms, measurement of horizontal angles (repetition method) & vertical angles, temporary and permanent adjustment of theodolite, procedure of traversing, sources of error in theodolite, closing error and its limitation. (04 Hrs)				
Unit-VI	Modern Surveying Instruments: Introduction, Electromagnetic spectrum, Electromagnetic distance measurement, Total station – working and operating principle, phase correction techniques, modulation components, data observations, accuracy, handling precautions, set up of total Station, Applications-generation of property maps of Total Station. (4Hrs)

Faculty of Science & Technology Syllabus of Second Year B. Tech (Civil Engineering) (Semester III)	
Course Category: PCC Course Code: CED203 Course: Strength of Materials Teaching Scheme: Theory- 3 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 2 Hrs.
Prerequisite	Students are required to have knowledge of Engineering Mechanics, Engineering Drawings and use of Scientific Calculator
Objectives	1. To provide the basic concepts and principles of strength of materials. 2. To give an ability to calculate stresses and deformations of objects under external loadings.
Unit-I	Simple Stresses and Strains: Stress and strain (linear, lateral, shear and volumetric), generalized Hooke's law. Elastic constants and their relationship for isotropic materials, stresses, strains and deformation in determinate homogeneous and composite bars under concentrated loads, thermal stresses. <p style="text-align: right;">(05Hrs)</p>
Unit-II	Shear Force and Bending Moment Diagrams: Concept and definition of shear force and Bending Moment, SFD and BMD for determinate beams, Beams under various kinds of loading, Stresses in beams due to bending. Theory of pure bending, Flexure formula. Bending stress distribution diagram, Moment of resistance and section modulus. <p style="text-align: right;">(04Hrs)</p>
Unit-III	Stresses in Beams due to Shear Forces: Shear stress distribution diagram for common symmetrical section (with at least one axis of symmetry), maximum and average shear stress. <p style="text-align: right;">(04Hrs)</p>
Unit-IV	Principal Stresses and Strains: Concept, stress on oblique plane, two-dimensional stress system, planes of maximum shear stress <p style="text-align: right;">(04Hrs)</p>
Unit-V	Columns and Struts: Concept of short and long columns, various end conditions, formulae. Limitation of Euler's Formula, equivalent length, eccentrically loaded short compression members, Direct and bending stresses: Bending combined with axial loads. <p style="text-align: right;">(04Hrs)</p>
Unit-VI	Strain Energy: Strain energy due to gradually applied loads, suddenly applied loads and impact loads. Torsion of circular shaft, stresses, strains and deformation indeterminate shafts of hollow and solid sections of homogenous and composite materials subjected to torsion. <p style="text-align: right;">(05Hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B.Tech. (Civil Engineering) (Semester III)	
Course Category: MDM Course Code: CED211 Course: Construction Machineries Teaching Scheme: Theory: 2 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 2 Hrs.
Prerequisite	Students are required to have knowledge of Fundamentals of Basic Civil Engineering.
Objectives	1. Adopting the ethical knowledge for Construction equipment 2. Construction Equipment parts and its working
Unit-I	Construction Instruments: Introduction to Construction Instruments: Their contribution and importance in construction Industry. Classification of Equipment, Financial aspects related to construction equipments: Discounted present worth analysis, Depreciation, Cost of owning and operating construction equipment, Basics of equipment replacement policy (6Hrs)
Unit-II	Introduction to Heavy Equipments: Introduction, Classification of heavy equipment based on: applications, truck type, crawl and wheel type, Application of heavy equipment, Terminologies used in heavy equipment (4Hrs)
Unit-III	Construction Equipment: introduction, construction, types, applications and general specifications of dozer, loader, excavator, grader, road roller, asphalt paving equipment, crane, Farm tractor: layout, different types of implements, accessories and attachments, tractor trolley, Special purpose vehicles: fork lift, fire brigade, dumper, tripper, truck. (4 Hrs)
Unit-IV	Types of Heavy Equipment Used in Construction - Excavator, Dragline Excavator, Backhoe, Bulldozer, Grader, Wheel Tractor Scraper, Trencher, Loader, Tower Crane, Paver, Stevens (4 Hrs)
Unit-V	Excavating Equipment: Power Shovels, Draglines, Hoes, Clam Shells and trenching machines, their basic Parts, Operation, Output estimation, Factors influencing output and methods to enhance it, Tractors and related equipment: Bulldozers, Rippers, Scrapers & overview of other Equipment (4 Hrs)
Unit-VI	Belt Conveyor System: Terminology, Classification, Components, Power requirement estimation and design. Hauling equipment: Trucks and wagons, operation and guideline for selection and deployment. (4 Hrs)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III) Open Elective-1 offered by the Department of Basic Sciences and Humanities	
Course Category: OEC Course Code: OEC241A Course: Introduction to Sociology Teaching Scheme: Theory: 03 Hrs./week	Credits: 3-0-0 In-Semester Examination -I: 15 Marks In-Semester Examination -II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration):02 Hrs.
Prerequisite	Communication Skills, critical thinking skills.
Objectives	The objective of this course is to let the students: 1. Describe foundational sociological theories and concepts. 2. Apply sociological perspectives to analyze social phenomena relevant to engineering contexts. 3. Evaluate the impact of social factors on engineering practices and outcomes. 4. Analyze ethical issues related to engineering in society. 5. Develop critical thinking skills for assessing social implications of engineering projects. 6. Communicate effectively about sociological issues within engineering communities.
Unit-I	Introduction to Sociology: Definition and subject matter of sociology, Sociology as a science and its nature, Sociology as a means to establish social harmony, Scope of sociology and early thinkers, perspectives in sociology, functionalist perspective, conflict perspective, interactionist, sociology and other social sciences, society, evolution of societies, agrarian society, hunter-gatherer society, feudal society, information society, tribal society, industrial societies, postindustrial society. <p style="text-align: right;">(07 Hrs)</p>
Unit-II	Socialization and Culture: Definition and importance of socialization in shaping individual identity and behaviour, Primary socialization: Family, peers. Secondary socialization: School, media, religion, and other social institutions, workplace, Cultural Norms, Values, and Symbols. <p style="text-align: right;">(06 Hrs)</p>
Unit-III	Social Structure and Inequality: Social stratification and mobility, Race, class, gender, and intersectionality, social institutions (family, education, economy, politics), Social institutions, need of an institution, characteristics of institution, kinds of institutions, functions of institutions, primary institutions, difference between institution & community: social stratification, gender stratification. <p style="text-align: right;">(06 Hrs)</p>
Unit-IV	Social Change and Globalization: Social change, theories of change types of theories of change, evolutionary, functionalist, conflict, factors of social change, resistance to change, Globalization and its consequences, social movements and activism. <p style="text-align: right;">(06 Hrs)</p>

Unit-V	Sociological Research Methods: Ethical Considerations in Sociological Research, Informed consent, confidentiality and anonymity, avoiding harm to participants, Research ethics review processes, Qualitative and Quantitative Research Methods, Ethnography, Participant observation, Interviews, Focus groups, Case studies, Surveys, Experiments, Content analysis, Secondary data analysis. <p style="text-align: right;">(07 Hrs)</p>				
Unit-VI	Engineering for Social Equity: Sociology of technology, Engineering ethics and social responsibility, Sociotechnical systems and their impacts, Introduction to the concept of the Bottom of the Pyramid (BoP) and its significance in global engineering. Ethical considerations in designing products and services for BoP markets. Innovative design approaches for affordability, accessibility, and sustainability in BoP contexts. Strategies for designing inclusive and equitable sociotechnical systems that prioritize human well-being and social justice. Sociological dimensions of emerging technologies (e.g., AI, biotechnology, renewable energy). <p style="text-align: right;">(07 Hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III) Open Elective-1 offered by the Department of Civil Engineering	
Course Category: OEC Course Code: OEC241B Course: Technology for Rural Development Teaching Scheme: Theory: 03 Hrs./week	Credits: 3-0-0 In-Semester Examination -I: 15 Marks In-Semester Examination -II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	No special requisites required
Objectives	<ol style="list-style-type: none">1. To understand the role of technology in the development of rural areas.2. To explore various technologies suitable for rural applications.3. To promote sustainable and inclusive development through technological interventions.
Unit-I	Introduction to Rural Development: Definition and scope of rural development; Characteristics of rural areas in India Importance of rural development in national growth; Government policies and programs for rural development. (06 Hrs)
Unit-II	Agricultural Technologies: Advanced agricultural practices; Mechanization in agriculture; Irrigation technologies Soil health and fertility management; post-harvest technologies. (06 Hrs)
Unit-III	Renewable Energy Technologies: Solar energy: solar PV and thermal systems; Wind energy: small-scale wind turbines Biomass energy: biogas and biofuels; Micro-hydropower systems; Implementation and case studies in rural areas. (07 Hrs)
Unit-IV	Water and Sanitation Technologies: Safe drinking water technologies; Low-cost sanitation solutions; Water conservation techniques; Wastewater management; Community-based approaches to water and sanitation. (06 Hrs)
Unit-V	Advanced Irrigation Technologies: Automation in irrigation systems, Use of sensors and remote sensing in irrigation, Irrigation scheduling and management, Water-saving technologies and practices, Use of GIS in irrigation. (07 Hrs)
Unit-VI	Rural empowerment: Causes of Rural Backwardness, Need for Rural technology Development and its Constraints, Rural Education with emphasis on Adult and Community Education, <u>Development of Rural Women and Children- Status and Development Strategies.</u> (07 Hrs)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III) Open Elective-1 offered by the Department of Civil Engineering	
Course Category: OEC Course Code: OEC241C Course: Professional Ethics and Corporate Social Responsibility Teaching Scheme: Theory: 03 Hrs./week	Credits: 3-0-0 In-Semester Examination -I: 15 Marks In-Semester Examination -II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	No general prerequisites required
Objectives	1. To develop an understanding of professional ethics in different organizational contexts. 2. To identify, analyze, and resolve ethical issues in business decision-making. 3. To develop various corporate social Responsibilities and practices in professional life
Unit-I	Professional Ethics and Business: The Nature of Business Ethics; Ethical Issues in Business; Moral Responsibility and Blame; Utilitarianism: Weighing Social Costs and Benefits; Rights and Duties of Business. <p style="text-align: right;">(06 Hrs)</p>
Unit-II	Professional Ethics in the Marketplace: Perfect Competition; Monopoly Competition; Oligopolistic Competition; Oligopolies and Public Policy Professional Ethics and the Environment: Dimensions of Pollution and Resource Depletion; Ethics of Pollution Control; Ethics of Conserving Depletable Resources. <p style="text-align: right;">(07 Hrs)</p>
Unit-III	Professional Ethics of Consumer Protection: Markets and Consumer Protection; Contract View of Business Firm's Duties to Consumers; Due Care Theory; Advertising Ethics; Consumer Privacy. <p style="text-align: right;">(06 Hrs)</p>
Unit-IV	Introduction to Corporate Social Responsibility: Concept, Scope & Relevance and Importance of CSR in Contemporary Society. CSR and Indian Corporations- Legal Provisions and Specification on CSR, A Score Card, Future of CSR. <p style="text-align: right;">(07 Hrs)</p>
Unit-V	Exploring the Dualities of Business Sustainability: Potential Business Benefits-Triple bottom line, Human resources, Risk management, Supplier relations; Criticisms and concerns of business; Motives; Misdirection. <p style="text-align: right;">(06 Hrs)</p>
Unit-VI	Role of Business in Sustainable Development: Sustainable Development, Role of Business in Sustainable Development, Sustainability Terminologies, Corporate Sustainability, Corporate Sustainability and Corporate Social Responsibility, Government

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III) Open Elective-1 offered by the Department of Electrical Engineering	
Course Category: OEC Course Code: OEC241D Course: Constitution of India Teaching Scheme: Theory: 03 Hrs./week	Credits: 3-0-0 In-Semester Examination -I: 15 Marks In-Semester Examination -II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	No general prerequisites required
Objectives	<ol style="list-style-type: none">1. To acquaint the students with legacies of constitutional development in India and help those to understand the most diversified legal document of India and philosophy behind it.2. To make students aware of the theoretical and functional aspects of the Indian Parliamentary System.3. To channel students' thinking towards a basic understanding of the constitutional principles and statutory institutions.
Unit-I	Introduction to Constitution: Meaning and Concept of Indian Constitution; Nature of Constitution; Brief Idea of Indian Constitution [Parts, Articles and Schedule]. <p style="text-align: right;">(06 Hrs)</p>
Unit-II	Silent Features of Indian Constitution: Written and Enacted Constitution; The longest and most detailed Constitution of the World; Rigidity and Flexible Constitution; Parliamentary system of Government; Federal system with unitary bias; Adult Franchise; Single Citizenship; Sovereign, Democratic, Republic; Secularism; Directive Principles of State Policy; Independent Judiciary; Fundamental Rights; Fundamental Duties. <p style="text-align: right;">(07 Hrs)</p>
Unit-III	Fundamental Rights: - Concept of State (Art. -12); Right to Equality (Art. -14 to 18); Right to Freedom (Art. -19 to 22); Right against Exploitation (Art. -23 & 24); Right to Religion (Art. -25 to 28); Right of Minorities (Art. -29 & 30); Constitutional Remedies (Art.-32). Fundamental Duties (Art.-51 A). <p style="text-align: right;">(06 Hrs)</p>
Unit-IV	Directive Principles of State Policy (DPSPs): Meaning and Significance of Directive Principles; Classification/ Principles of D.P.S.P.; Relationship between F.Rs. and D.P.S.P. <p style="text-align: right;">(07 Hrs)</p>
Unit-V	Executives Union Government the President, Council of Ministers and Prime Minister. State Government The Governor, Council of Ministers and Chief Minister. <p style="text-align: right;">(06 Hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III) Open Elective-1 offered by the Department of Electrical Engineering	
Course Category: OEC Course Code: OEC241E Course: Electrical, Fire and Vehicle Safety Teaching Scheme: Theory: 03 Hrs./week	Credits: 3-0-0 In-Semester Examination -I: 15 Marks In-Semester Examination -II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	<ul style="list-style-type: none">- Basic understanding of physics and chemistry concepts- Familiarity with engineering principles, including circuit theory- Knowledge of automotive technology, including vehicle components and systems.
Objectives	<ol style="list-style-type: none">1. Develop a comprehensive understanding of electrical safety principles and hazards.2. Analyze the causes and dynamics of fires and implement preventive measures.3. Examine safety protocols and regulations pertaining to vehicle electrical systems.4. Acquire practical skills in identifying, mitigating, and responding to safety risks.
Unit-I	Introduction to Electrical safety and Safety Management: General Background of Electricity, General Safety Provisions in Indian Electricity Rules, OSHA Standards on Electrical Safety, Basic Electrical Safety Rule as per OSHA, Terms and Definitions, Objectives of Safety and Security Measures, Effect of Electrical Current on the Human Body, Case studies highlighting real-world examples of electrical fires and their consequences. <p style="text-align: right;">(07 Hrs)</p>
Unit-II	Electrical Shocks and their Prevention: Primary and Secondary Electric shocks, Occurrence of Electric Shock, Possibility of Getting Electric Shock, Severity of Electric Shock, Medical Analysis of Electric Shock and Its Effects, AC Shocks Versus DC Shocks, Shocks Due to Flashovers, Lightning Strokes on Overhead Transmission Lines, Prevention of Shocks, FIRST AID, Removal of Contact with Live Conductor, Artificial Respiration, Schafer's Prone Pressure Method, Accident Management and Safety Management. <p style="text-align: right;">(06 Hrs)</p>
Unit-III	Introduction to Electrical Fire and Prevention: Introduction, Terms and definition, causes of initiation of fires, types of Fires Class A Fires, Class B fires, Class C Fires, Class D fires, Class E Fires, Fire Extinguishing techniques, Fire Hazard Analysis, Prevention of Fires, Fire protection and loss prevention, step after occurrences of fires. <p style="text-align: right;">(06 Hrs)</p>

Course Category: HSSM Course Code: HSM201 Course: Engineering Economics and Management Teaching Scheme: Theory: 2 Hrs./week	Credits: 2-0-0 In-Semester Examination-II: 10 Marks Teacher Assessment: 15 Marks
Prerequisite	No general prerequisites required
Objectives	<ol style="list-style-type: none">1. To introduce students to the fundamental principles of industrial management.2. To familiarize students with various aspects of industrial operations.3. To provide students with knowledge of real-world industrial management challenges.
Unit-I	Introduction to Engineering Economics: Introduction to Economics, Importance, and scope of economics in engineering, Economic analysis and its role in project management, Overview of economic principles and concepts relevant to engineering, Micro - and macro-economics, economics of growth and development, Demand and supply analysis. (05 Hrs)
Unit-II	Cash Flow and Time Value of Money: Interest rates, compounding, and discounting, Present value and future value analysis, Equivalent annual cost analysis. Cash Flow – Diagrams, Categories & Computation, Calculations, Treatment of Salvage Value, Annual Cash Flow Analysis, Analysis, Calculating Rate of Return, Incremental Analysis. (05 Hrs)
Unit-III	Elements of Managerial Economics: Cost & Cost Control –Techniques, Types of Costs, Lifecycle Costs, Budgets, Break-even Analysis, Capital Budgeting, Application of Linear Programming. Investment Analysis – NPV, ROI, IRR, Payback Period, Depreciation, Time value of money (present and future worth of cash flows). Business Forecasting – Elementary techniques. (04 Hrs)
Unit-IV	Business Organization: Concept of organization, Elements of Organization, Types of Business organization, Principles of Organization, Organization structure. (04 Hrs)
Unit-V	Management Concept: Management, Administration, Organization, Managerial skills, Evolution and development of Management Thought, Principles of Management, Functions of Management, Levels of Management. (04 Hrs)
Unit-VI	Human Resource Management: Introduction, Definitions, and Concept of HRM, Functions and objectives of HRM, Manpower Planning, Recruitment and selection, Training and development, Compensation Management. (04 Hrs)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III / IV)	
Course Category: HSSM Course Code: HSM202 Course: Innovation and Entrepreneurship Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-II: 10 Marks Teacher Assessment: 15 Marks
Prerequisite	There is no general prerequisite required
Objectives	<ol style="list-style-type: none">1. Develop awareness about entrepreneurs and entrepreneurship.2. Describe the functions and characteristics of entrepreneurs and entrepreneurship.3. Discuss the concept of innovation and entrepreneurship.4. Identify concepts, principles, and strategies with reference to social entrepreneurship and social innovation.
Unit-I	Introduction to Entrepreneurship: Introduction, the concept of entrepreneur, entrepreneurship, and social entrepreneurship, the definition of entrepreneurship, four types of entrepreneurships and entrepreneur, the importance of entrepreneurship, and characteristics of entrepreneurship. (04 Hrs)
Unit-II	Innovation & Entrepreneurship: Definition of Innovation, Fundamentals of Innovation, Types of Innovation - Incremental, Disruptive, and Radical, The Innovation Process: from idea to execution The Innovation-Entrepreneurship Relationship, Entrepreneurial Mindset, Corporate Entrepreneurship, Social Impact Innovation. (04 Hrs)
Unit-III	Creativity and Innovation: Foundations of Creativity and Innovations, Creative thinking process, Developing a creative mindset, Overcoming creative blocks, Exploring Types of Innovation through Case Studies (04 Hrs)
Unit-IV	Entrepreneurship Development Process: Introduction, the process of entrepreneurship development, objectives of the entrepreneurship development program, the process of entrepreneurship development, entrepreneurship development, and start-up India, Indian entrepreneurship development challenges. (05 Hrs)
Unit-V	Entrepreneurship as Innovation and Problem-Solving: Entrepreneurs as problem solvers, innovations, and entrepreneurial ventures – global and Indian role of technology – e-commerce and social media, social entrepreneurship – concept. (04 Hrs)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III / IV)	
Course Category: VEC Course Code: VEC201 Course: Universal Human Values Teaching Scheme: Theory: 01 Hrs./week Practical: 02 Hrs./Week	Credits: 1-0-1 In-Semester Examination-II: 10 Marks Teacher Assessment: 15 Marks
Prerequisite	No general prerequisites are required.
Objectives	This course aims to enable students, 1. To appreciate the essential complementarity between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity, which are the core aspirations of all human beings. 2. To facilitate the development of a holistic perspective among students to lead their personal and professional lives in an ethical way. 3. To highlight plausible implications of such a holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behavior, and mutually enriching interaction with nature.
Unit-I	Introduction to Value Education <ul style="list-style-type: none">• Understanding Value Education• Self-exploration as the Process for Value Education• Continuous Happiness and Prosperity - the Basic Human Aspirations and their Fulfilment• Right Understanding, Relationship and Physical Facility• Happiness and Prosperity - Current Scenario• Method to Fulfil the Basic Human Aspirations <p style="text-align: right;">(02 Hrs)</p>
Unit-II	Harmony in the Human Being <ul style="list-style-type: none">• Understanding Human being as the Co-existence of the Self and the Body• Distinguishing between the Needs of the Self and the Body• The Body as an Instrument of the Self• Understanding Harmony in the Self• Harmony of the Self with the Body• Programme to Ensure self-regulation and Health <p style="text-align: right;">(02 Hrs)</p>
Unit-III	Harmony in the Family <ul style="list-style-type: none">• Harmony in the Family - the Basic Unit of Human Interaction "Trust' - the Foundational Value in Relationship• 'Respect' - as the Right Evaluation Values in Human-to-Human Relationship <p style="text-align: right;">(02 Hrs)</p>
Unit-IV	Harmony in the Society <ul style="list-style-type: none">• Other Feelings, Justice in Human-to-Human Relationship• Understanding Harmony in the Society• Vision for the Universal Human Order <p style="text-align: right;">(02 Hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III / IV)	
Course Category: VEC Course Code: VEC202 Course: Environmental Studies Teaching Scheme: Theory: 01 Hr/week, Practical: 02 Hrs/Week	Credits: 1-0-1 In-Semester Examination -II: 10 Marks Teacher Assessment: 15 Marks
Prerequisite	Understanding of the Concept of Environment.
Objectives	<ol style="list-style-type: none">1. To study the environment and ecosystems.2. To study different types of natural resources.3. Knowledge and concept of biodiversity and its conservation.4. Basic knowledge and concept of causes, effects, and control of different types of environmental pollution.5. To study population growth and its impact on the environment
Unit-I	Introduction to environmental studies and natural resources: Definition, scope and importance and need for public awareness. Natural resources: Forest resources: Use and over-exploitation, deforestation. Timber extraction. Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams benefits and problems. Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources. (02 Hrs)
Unit-II	Food, energy, and land resources: Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity. Energy resources: Growing energy needs, renewable and non-renewable energy sources, and use of alternate energy sources. Land resources: Land as a resource, land degradation, man-induced landslides, soil erosion, and desertification. (02 Hrs)
Unit-III	Ecosystems: Concept of an ecosystem. Structure and function of an ecosystem. Producers, consumers, and decomposers. Energy flow in the ecosystem. Ecological succession. Food chains, food webs, and ecological pyramids. Introduction, types, characteristic features, structure, and function of the following ecosystems: Forest ecosystem, Grassland ecosystem, Desert ecosystem, and Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries). (02 Hrs)
Unit-IV	Biodiversity and its conservation: Introduction – Definition: genetic, species, and ecosystem diversity. Biogeographical classification of India. Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts. Endangered and endemic species of India. Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity. (02 Hrs)

(An Autonomous Institute)

Unit-V	Environmental Pollution: Definition, Cause, effects, and control measures of Air pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, nuclear hazards, Role of an individual in the prevention of pollution. (03 Hrs)				
Unit-VI	Social Issues and the Environment: From Unsustainable to sustainable development. Urban problems related to energy. Climate change, global warming, acid rain, ozone layer depletion Environment Protection Act. Public awareness. (02 Hrs)				
List of Exercise	<ol style="list-style-type: none"> 1. Study of a local hilly area to document environmental assets. 2. Study of a forest area as an environmental asset. 3. Study assignment on sustainable development goal, 'No Hunger'. 4. Case study on landslide. 5. Poster making on food chain, food web and ecological pyramids. 6. Study of hotspots of biodiversity in India as a mega diversity nation. 7. Assignment on causes, effects and control measures of urban and industrial wastes. 8. Working out a plan of roof top rainwater harvesting for a house. 9. Case study on resettlement and rehabilitation of people because of developmental activities such as dams, mining, etc. 10. Visit to local polluted site

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III)	
Course Category: ELC Course Code: ELC221 Course: Community Engagement Project Teaching Scheme: Practical: 04 Hrs/Week	Credits: 0-0-2 Teacher Assessment: 25 Marks
Course Description	The "Community Engagement Project" course is designed to provide students with field-based learning experiences that integrate their theoretical knowledge of major discipline of engineering with real-life socio-economic issues. Students will engage in projects that address community needs, enhancing their understanding of the role of engineering in society and developing their problem-solving and communication skills.
Objectives	<ol style="list-style-type: none"> 1. To expose students to socio-economic issues and challenges in society. 2. To apply theoretical knowledge to develop practical solutions to real-life problems. 3. To enhance students' communication, teamwork, and project management skills. 4. To foster a sense of social responsibility and ethical awareness among students.
Learning Outcomes	By the end of the course, students will be able to: <ol style="list-style-type: none"> 1. Identify and analyze socio-economic issues in the community. 2. Apply engineering principles to propose and implement solutions to community problems. 3. Work effectively in teams to achieve project goals. 4. Communicate project findings and solutions effectively in written and oral forms. 5. Reflect on the social impact of their projects and their role as engineers in society.
Implementation guidelines	<ol style="list-style-type: none"> 1. A group of four students, under the guidance of faculty mentors, conduct a Socioeconomic Survey of the nearby area/ habitation. They will interact with people and conduct the survey using a structured questionnaire. 2. The group of students will choose a topic related to their subject area relevant to their major discipline and conduct a Project which includes data collection and analysis and a conclusion/ solution on a selected problem. 3. Students should submit a project report duly signed by the mentor. 4. Assessment should be done by a mentor continuously (Rubrics based)
Assessment Methodology	<ol style="list-style-type: none"> 1. Field Work and Engagement (40%) <ul style="list-style-type: none"> o Quality and effectiveness of community engagement. o Depth of data collection and analysis. o Ability to identify and understand community issues. 2. Project Implementation (30%) <ul style="list-style-type: none"> o Creativity and feasibility of proposed solutions. o Effectiveness of implementation. o Adaptation and problem-solving during implementation. 3. Reports and Documentation (20%) <ul style="list-style-type: none"> o Documentation of data, process, and outcomes.

Maharashtra Institute of Technology

Chhatrapati Sambhajnagar
(An Autonomous Institute)

	<ul style="list-style-type: none"> ○ Reflection on personal learning and project impact. <p>4. Presentation (10%)</p> <ul style="list-style-type: none"> ○ Clarity and effectiveness of oral presentation. ○ Ability to communicate project findings and solutions. ○ Engagement with audience and response to questions.
--	--

Rubrics for Assessment:

Criteria	Excellent (5)	Good (4)	Satisfactory (3)	Needs Improvement (2)	Inadequate (1)
Field Work and Engagement	Thorough and insightful engagement with the community. Extensive data collection and deep understanding of issues.	Effective engagement with the community. Adequate data collection and good understanding of issues.	Satisfactory engagement with the community. Basic data collection and understanding of issues.	Limited engagement with the community. Incomplete data collection and understanding of issues.	Minimal or no engagement with the community. Poor or no data collection and understanding of issues.
Project Implementation	Innovative and highly feasible solutions. Effective implementation with positive impact.	Creative and feasible solutions. Good implementation with noticeable impact.	Basic but feasible solutions. Satisfactory implementation with some impact.	Limited creativity in solutions. Ineffective implementation with minimal impact.	No feasible solutions. Poor or no implementation with no impact.
Reports and Documentation	Comprehensive and clear reports. Thorough documentation of process and outcomes. Reflective insights.	Clear and detailed reports. Good documentation of process and outcomes. Some reflective insights.	Adequate reports. Basic documentation of process and outcomes. Limited reflective insights.	Incomplete or unclear reports. Inadequate documentation of process and outcomes. Minimal reflective insights.	Poor or no reports. No documentation of process and outcomes. No reflective insights.
Presentation	Highly effective and engaging presentation. Clear communication of findings and solutions.	Effective presentation. Clear communication of findings and solutions.	Satisfactory presentation. Basic communication of findings and solutions.	Unclear or disorganized presentation. Limited communication of findings and solutions.	Poor or no presentation. Unable to communicate findings and solutions.

Suggested Reading Materials and Resources:

1. **Book:** "The Community Engagement Professional in Higher Education" by Lina D. Dostilio
2. **Web Resources:** IEEE Xplore Digital Library for research papers on community engagement projects. Also, refer websites of NGOs and community organizations for case studies and project ideas.

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester III)	
Course Category: Seminar Course Code: SEM222 Course: Seminar Teaching Scheme: Practical: 02 Hrs/Week	Credits: 0-0-1 Teacher Assessment: 25 Marks
Course Description	The Seminar course is designed to develop students' research, presentation, and communication skills through the preparation and presentation of seminars. The topics for the seminars will be related to the Open Elective-1 Course chosen by the students. Under the supervision of faculty, students will engage in independent research, organize their findings, and present them effectively to their peers and faculty members. This course aims to enhance students' ability to communicate complex ideas clearly and confidently, fostering a deeper understanding of their elective subjects.
Assessment Methodology	The assessment for the Seminar course will be based on continuous evaluation of the following components: <ol style="list-style-type: none">Topic Selection and Proposal (20%)<ul style="list-style-type: none">Relevance and appropriateness of the selected topic.Clarity and feasibility of the seminar proposal.Literature Review (20%)<ul style="list-style-type: none">Depth and thoroughness of the literature review.Use of credible and relevant sources.Seminar Outline and Content Development (20%)<ul style="list-style-type: none">Logical organization and structure of the seminar.Clarity and coherence of the content.Integration of theoretical concepts with practical examples.Presentation Skills (20%)<ul style="list-style-type: none">Clarity, confidence, and engagement during the presentation.Effective use of visual aids and multimedia.Ability to handle questions and engage in discussion.Seminar Report (20%)<ul style="list-style-type: none">Quality and thoroughness of the written seminar paper.Proper formatting, citations, and adherence to guidelines.
	Guidelines for Implementation: <ol style="list-style-type: none">Supervision and Guidance:<ul style="list-style-type: none">Faculty members will supervise the seminar preparation and presentation process.Regular meetings will be scheduled for discussing progress and providing feedback.Topic Selection:<ul style="list-style-type: none">Students will select topics related to their open elective courses.Topics must be approved by the supervising faculty.Literature Review:<ul style="list-style-type: none">Students will conduct a thorough literature review using credible academic sources.An annotated bibliography will be prepared as part of the assessment.Seminar Preparation:<ul style="list-style-type: none">Students will develop a detailed outline and structure for their seminar.

	<ul style="list-style-type: none"> o Visual aids and multimedia tools will be used to enhance the presentation. <p>5. Presentation:</p> <ul style="list-style-type: none"> o Students will present their seminars to peers and faculty. o Each presentation will be followed by a Q&A session. <p>6. Final Submission:</p> <ul style="list-style-type: none"> o A written seminar report summarizing the research and presentation will be submitted. o Proper formatting and citation guidelines must be followed.
--	--

Rubrics for Assessment:

Criteria	Excellent (5)	Good (4)	Satisfactory (3)	Needs Improvement (2)	Inadequate (1)
Topic Selection and Proposal	Highly relevant and innovative topic. Clear and feasible proposal.	Relevant and clear topic. Feasible proposal with minor improvements needed.	Adequate topic. Proposal is clear but lacks innovation.	Topic relevance is questionable. Proposal lacks clarity and feasibility.	Irrelevant or inappropriate topic. Poor or no proposal.
Literature Review	Comprehensive and insightful review. Uses a wide range of credible sources.	Thorough review with mostly credible sources.	Adequate review with some credible sources. Basic synthesis of information.	Limited review with few credible sources. Weak synthesis and analysis.	Poor or no review with irrelevant or no credible sources. No synthesis or analysis.
Seminar Outline and Content Development	Clear, logical, and well-organized outline. Content is comprehensive and well-developed.	Good outline and organization. Content is clear with minor gaps.	Adequate outline with some organization. Content covers basic points.	Poorly organized outline. Content is incomplete or lacks coherence.	No clear outline. Content is disorganized and lacks substance.
Presentation Skills	Engaging, clear, and confident presentation. Effective use of visual aids. Handles Q&A expertly.	Clear and confident presentation. Good use of visual aids. Handles Q&A adequately.	Adequate presentation with some clarity issues. Basic use of visual aids. Manages Q&A with difficulty.	Unclear or hesitant presentation. Limited use of visual aids. Struggles with Q&A.	Poor or no presentation. Ineffective or no use of visual aids. Unable to handle Q&A.
Seminar Report	Thorough and well-written Report. Proper formatting and citations. Reflects deep understanding.	Good Report with minor errors. Mostly proper formatting and citations. Shows good understanding.	Adequate Report with some errors. Basic formatting and citations. Shows basic understanding.	Poorly written Report with many errors. Inadequate formatting and citations. Limited understanding.	No or very poorly written Report. Incorrect or no formatting and citations. Lacks understanding.

Faculty of Science & Technology
Syllabus of Second Year B.Tech. (Civil Engineering) (Semester III)

Course Category: **PCC**
Course Code: CED223
Course: **Surveying and Leveling Lab**
Teaching Scheme: Practical: 02 Hrs/Week

Credits: 0-0-1
Teacher Assessment: 25 Marks
End Semester Oral Examination: 25 Marks

Prerequisite	Students are required to have basic knowledge of Civil Engineering
Objectives	Students will be able to know the Concepts and methods of measurement of lands and handle equipments required for surveying and leveling works.
(A) List of the Practicals	All are Compulsory. 1. Measuring of Bearing of Traverse Lines, Calculations of Included Angles and check. 2. Study of Dumpy and Auto levels and Calculate RLs & check. 3. Calculate RLs using differential and check levelling (at least 2 change points). 4. Study and use of plane table survey by Radiation and Intersection. 5. Measurement of Horizontal and Vertical angle by simple method (Face left and faces Right observations.) 6. Study of Total Station (A) Measurement of Horizontal and Vertical angle (B) Measurement of area of traverse.
(B) Project	All are Compulsory 1. Road project 2. Block contouring by using Level/ Total Station. 3. Traversing using Theodolite/ Total Station.

The assessment shall be based on experiments in field book and three sheets of project.

Maharashtra Institute of Technology

Chhatrapati Sambhajanagar
(An Autonomous Institute)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (Civil Engineering) (Semester III)

Course Category: **PCC**
Course Code: CED224
Course: **Strength of Materials Lab**
Teaching Scheme: Practical: 02 Hrs/Week

Credits: 0-0-1
Teacher Assessment: 25 Marks
End Semester Oral Examination: 25 Marks

Objectives

To give an ability to apply the knowledge of strength of materials on engineering applications and design problems.

List of Practical

Any Six of the following:

1. Tension test on the ductile materials (Mild steel and TOR steel/HYSD steel/ TMT bars)
2. Flexural test on concrete /timber beam
3. Shear test on metals
4. Testing on bricks/Autoclaved aerated concrete (AAC) blocks water absorption and compression
5. Izod Impact tests on metals
6. Charpy Izod Impact tests on metals
7. Torsion test on steel
8. Brinell Hardness test
9. Rockwell hardness test
10. Abrasion test on flooring tiles
11. Transverse test on flooring tiles.

The assessment shall be done on the basis of the following.

- Continuous assessment
- Performing the experiments in the laboratory
- Oral examination conducted on the syllabus and term work mentioned above.

Faculty of Science & Technology Syllabus of Second Year B.Tech. (Civil Engineering) (Semester IV)	
Course Category: PCC Course Code: CED 251 Course: Theory of Structures Teaching Scheme: Theory: 03 Hrs./week	Credits: 3-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration):02 Hrs.
Prerequisite	Students required to have knowledge of Engineering Mechanics, Strength of Materials, Basics of integral and differential Calculus
Objectives	Students will be able <ul style="list-style-type: none">To understand the basic concepts of Structural Analysis.To understand behaviour of different types of structures under various loading and support conditions.To study various methods of Structural Analysis.
Unit-I	Beam Deflections: Calculations of deflection for determinate beams by double integration, Macaulay's method, moment area method, conjugate beam method. (04 Hrs)
Unit-II	Method of Consistent Deformation: Basic concepts of Structural Analysis, types and classification of structures, indeterminacy, choice of unknowns. Indeterminate Beams: a) Analysis of indeterminate beams- Propped cantilever and fixed beams- fixed end moments and reactions for standard cases of loading- slope and deflection in fixed beam. b) Three moment theorem and its application in continuous beams. (08 Hrs)
Unit-III	Slope Deflection Method: Analysis of continuous beams, settlement effects, analysis of rigid jointed frames, frames without sway and with sway, Shear Force and Bending Moment diagrams for above. (07 Hrs)
Unit-IV	Moment Distribution Method: Analysis of continuous beams, settlement effects, analysis of rigid jointed frames, frames without sway and with sway, Shear Force and Bending Moment diagrams for above. (07 Hrs)
Unit-V	Moving Loads and Influence Lines: Introduction to moving loads, concept of equivalent UDL, absolute maximum bending moment and shear force, concept of influence lines, influence lines for reaction, shear force, bending and deflection of determinate beams, influence line diagram (ILD) for forces in determinate frames and trusses, analysis for different types of moving loads, single

Faculty of Science & Technology Syllabus of Second Year B. Tech. (Civil Engineering) (Semester IV)	
Course Category: PCC Course Code: CED 252 Course: Fluid Mechanics Teaching Scheme: Theory: 03 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration):02 Hrs.
Prerequisite	Students are required to have basic knowledge of concepts of engineering mechanics.
Objectives	The objectives of the course are 1. To study the behavior of fluid under static, kinematic and dynamic conditions. 2. To apply mass, momentum, energy equation to fluid flow.
Unit-I	a) Fluid Properties: Scope, Relevance of Fluid Mechanics, Physical properties of fluids: Newton's Law of Viscosity, Rheological diagram, compressibility, cohesion, adhesion, surface tension, capillarity, vapor pressure. b) Dimensional Analysis and Similarity: Dimensions of physical quantities, Dimensional homogeneity, Dimensional homogeneity, Raleigh and Buckingham Pi theorems, Model laws; distorted and undistorted models. Similitude-Types of similarities. <div style="text-align: right;">(04 Hrs.)</div>
Unit-II	a) Measurement of Pressure & Hydrostatics Force on Surfaces: The basic equation of hydrostatics, concept of pressure head, Measurement of pressure datum (absolute, gauge), Application of the basic equation of hydrostatics. Types of manometers, Total pressure, Center of pressure for plane and curved surfaces, Pressure Diagrams b) Buoyancy and Floatation: Principle of floatation and buoyancy, equilibrium of floating bodies, Equilibrium of floating bodies and submerged bodies, stability of floating bodies. Metacenter and metacentric height and its determination. <div style="text-align: right;">(05 Hrs)</div>
Unit-III	Fluid Dynamics: Forces acting on fluid in motion, Euler's equation, Bernoulli's Equation, Momentum equation. Measurement of Flow, Venturimeter, orifice meter, Pitot tube, orifices, mouthpieces. <div style="text-align: right;">(04 Hrs)</div>
Unit-IV	Fluid Kinematics: Methods for describing the motion of fluid; Velocity and acceleration of fluids, Type of flow: Steady and unsteady, uniform and non-uniform, Laminar and Turbulent, one, two and three dimensional flows, Stream line, path line, streak line and stream tube: stream function, velocity potential function. <div style="text-align: right;">(04 Hrs)</div>
Unit-V	Flow through Open Channel: Difference between pipe flow and open channel flow. Types of channels Geometric properties, most economical sections and their expressions, specific energy diagrams, alternate depths, Froude number, specific force, critical flow. Non uniform flow in channels, slope profiles, measurement of flow in channels, Hydraulic jump. <div style="text-align: right;">(05Hrs)</div>

Maharashtra Institute of Technology

Chhatrapati Sambhajanagar
(An Autonomous Institute)

Unit-VI	Turbulent Flow: Reynolds experiment, Transition from laminar to turbulent flow. Flow through pipes Energy losses. in pipe-flow.(major losses and minor losses),Darcy Weisbach equation, flow through pipes such as simple, compound, series parallel, branched pipes, three reservoir problem (Hardy cross method). (04Hrs)

Faculty of Science & Technology Syllabus of Second Year B. Tech. (Civil Engineering) (Semester IV)	
Course Category: PCC Course Code: CED 253 Course: Concrete Technology Teaching Scheme: Theory: 03 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15 Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Students are required to have basic knowledge of construction materials.
Objectives	The objectives of the course are 1. To define and understand concepts related Concrete technology which involves types and property of concrete and different adhesive materials and its vital use for safe, economic development for the buildings. 2. To present the foundations of many basic Engineering tools and concepts related to Concrete technology and Civil Engineering. 3. To give an experience in the implementation of engineering concepts those are applied in field of Civil Engineering. 4. To study the Non-Destructive testing of concrete 5. To study the design of concrete mix design 6. To study the special concretes and sustainable concrete designs using waste materials.
Unit-I	Cement: Chemical Constituents of OPC and effect on their properties, Bogue's compounds and their properties, hydration of cement. Physical properties of OPC: fineness, standard consistency, setting time, soundness, compressive strength, Different grades of OPC with specifications as per relevant IS codes, Testing of cement: Field tests and laboratory tests-fineness test, standard consistency test, setting time test, soundness test, compressive strength test, Storage of cement and effect of storage on properties of cement, I.S. Specifications and field applications of different types of cements. <p style="text-align: right;">(04 Hrs)</p>
Unit-II	Aggregate : Requirement of good aggregates as per I. S. Code, Classification according to source, size and shape. Fine aggregates: Properties, size, specific gravity, bulk density, water absorption and bulking, fineness modulus and grading zone of sand by sieve analysis, silt content in sand and their specification as per IS Code, bulking of sand. Concept of crushed Sand, Coarse aggregates: Properties, size, shape, surface texture, grading of coarse aggregates water absorption, soundness, specific gravity and bulk density, crushing value, impact value, abrasion value and fineness modulus of coarse aggregate by sieve analysis with specification. Water: Quality of water, impurities in mixing water, and permissible limits for solids as per IS Code, use of sea water for mixing concrete. <p style="text-align: right;">(04 hrs)</p>
Unit-III	Concrete Necessity of supervision for concreting operation, different grades of concrete as per Indian

Master Copy

(An Autonomous Institute)

	<p>Standards. Water-cement ratio. Duff Abraham w/c law, significance and selection of w/c ratio for different grades of concrete, maximum w/c ratio for different grades of concrete for different exposure conditions.</p> <p>Properties of fresh concrete: Workability, Factors affecting workability of Concrete. Determination of workability of concrete by slump cone test, compaction factor test. Range values of workability requirement for different types of concrete works. Segregation, bleeding and preventive measures, Properties compressive of Hardened concrete: strength, durability, impermeability and dimensional changes of concrete.</p> <p style="text-align: right;">(05 hrs)</p>				
Unit-IV	<p>Testing of Hardened Concrete</p> <p>Compressive strength, tensile strength, modulus of elasticity and Poisson's ratio and its computation, Permeability, creep and shrinkage: measurement and parameters affecting them. Introduction to durability of concrete and factors affecting it. Minimum & Maximum Cement Content, Strength & Durability Relationship, Exposure to Different Conditions Factors Contributing to Cracks in Concrete, Sulphate Attack, Alkali Aggregate Reaction (AAR), factors affecting on AAR, deteriorating effects of AAR, Chloride Attack, Corrosion of Steel (Chloride Induced).</p> <p style="text-align: right;">(05 hrs)</p>				
Unit-V	<p>Concrete Mix Design</p> <p>Concepts of Mix Design, Factors affecting proportioning, Factors to be considered, Statistical quality control, Methods of Mix Design as per IS 10262. Quality Measurement in Concrete Construction, Non-destructive Testing of Concrete (Rebound Hammer, UPV, etc.).</p> <p style="text-align: right;">(04 hrs)</p>				
Unit-VI	<p>Special Concretes and Special Concreting Techniques</p> <p>Special concrete: light weight concrete, polymer concrete, types of fibres, fibre reinforced concrete, high-density concrete, self-compacting concrete and applications. Special concreting techniques: pumping of concrete, under water concreting, ready mixed concrete, roller compacted concrete. Use of wastes in concrete such as plastics, Fly ash, RHA, glass, etc.</p> <p style="text-align: right;">(04 hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B. Tech. (Civil Engineering) (Semester IV)	
Course Category: MDM Course Code: CED261 Course: Building Planning & Drawing Teaching Scheme: Theory: 03 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration):02 Hrs.
Prerequisite	Students are required to have to knowledge of fundamentals civil engineering.
Objectives	1. To understand the importance of principles of planning and bylaws. 2. To get introduced to different building materials and its uses. 3. To plan and draw the building drawing with considering different parameters. 4. To Prepare Line Plan of residential and public buildings using principles of planning
Unit-I	Building Materials – Classification of building materials, Requirements of building materials and products, Surface Finishes-Pointing, Plastering, mortars and concrete, Paints and Varnishes: types and uses. Collect detailed set of drawings of flat scheme from construction site and study it.(Field Visit to Construction Site) (04 Hrs)
Unit-II	Bricks and Tiles- Classification, Brick masonry, stone masonry and block masonry. Doors–Types and Material used, Windows- Types and materials used, Floors-types of floors, Roofs- materials used & types. Measure any block in institute building and draw the line plan of measured building. (04Hrs)
Unit-III	Principles of Planning of Residential and Public Building- Aspect, Prospect, Orientation, Grouping, Privacy, Elegance, Flexibility, Roominess, Circulation, Sanitation, Furniture Requirement, and Economy. Draw line plan to suitable scale residential bungalow (1 BHK, staircase, WC and Bathroom) (Full imperial sheet). (04 Hrs)
Unit-IV	Bye-laws: Rules and Bye-laws of sanctioning authorities for construction work. Necessity of laws, floor area ratio (F.A.R.), Built-up area, floor area, carpet area. Prepare Submission Drawing to scale 1:100 of (G+1) load bearing structure residential building (2 BHK) with flat roof and staircase showing i) developed plan ii) elevation iii) section passing through stair, WC and Bath iv) site plan (1:200) and area statement v) Schedule of Opening and construction notes. (Draw Sheet) (04 Hrs)
Unit-V	Perspective Drawing- Concept, types, one point & two-point perspective for buildings.

Maharashtra Institute of Technology

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester IV) Open Elective-2 offered by the Department of Agricultural Engineering	
Course Category: OEC Course Code: OEC291A Course: Smart Agriculture Practices Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Fundamentals of agriculture and basic sciences knowledge required
Objectives	<ol style="list-style-type: none">1. To understand the concept and importance of smart agriculture.2. To learn about the technologies and practices used in smart agriculture.3. To explore the impact of smart agriculture on productivity and sustainability.4. To develop practical skills in using smart agriculture technologies.
Unit-I	Introduction to Smart Agriculture: Definition and scope of smart agriculture Benefits and challenges of smart agriculture: productivity, reduced resource wastage (water, fertilizers, etc.), improved decision-making through data analysis, and enhanced sustainability. Challenges include high initial costs, technological complexity, and the need for training and education. <p style="text-align: right;">(04 Hrs)</p>
Unit-II	Data Analytics in Agriculture: Basics of data analytics. Data analytics involves the process of collecting, processing, and analyzing data to extract useful information and insights. <p style="text-align: right;">(04 Hrs)</p>
Unit-III	Precision Agriculture: Principles and components of precision agriculture. Technologies used in precision agriculture: GPS for location-based data, GIS for spatial analysis, and remote sensing for monitoring crop health and environmental conditions. Precision agriculture applications: Variable rate technology allows for the precise application of inputs (fertilizers, pesticides) based on localized conditions, and site-specific management tailors farming practices to the specific needs of different areas within a field. <p style="text-align: right;">(05 Hrs)</p>
Unit-IV	Smart Irrigation Systems: Introduction to smart irrigation: Benefits and challenges of smart irrigation: Benefits include water savings, improved crop yields, and reduced labor costs. Challenges include high initial costs and the need for proper maintenance and monitoring. <p style="text-align: right;">(04 Hrs)</p>

Chhatrapati Sambhajanagar
(An Autonomous Institute)

Unit-V	Smart Crop Management: Crop monitoring and management practices: Smart agriculture technologies such as drones, sensors, and data analytics are used to monitor crop health, detect diseases and pests, and optimize crop management practices. Crop health monitoring using smart technologies: Sensors and drones can be used to monitor crop health indicators such as leaf color, temperature, and humidity. Crop modeling and forecasting: Data from sensors and other sources can be used to develop crop models that predict yields, water requirements, and optimal planting times. These models help farmers make informed decisions about crop management. <p style="text-align: right;">(05 Hrs)</p>				
Unit-VI	Case Studies and Practical Applications: Real-world examples of smart agriculture practices: Case studies from around the world showcase how smart agriculture technologies are being used to improve farming practices, increase yields, and enhance sustainability. <p style="text-align: right;">(04 Hrs)</p>

Syllabus of Second Year B.Tech. (All Branches) (Semester IV) Open Elective-2 offered by the Department of Civil Engineering

Course Category: OEC Course Code: OEC291B Course: Solid Waste Management Teaching Scheme: Theory: 02 Hrs./week		Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Basic knowledge of concepts of economics.	
Objectives	<ol style="list-style-type: none">1. Understanding the principles and functional elements of SWM2. To know the way of generation of different kind of solid waste.3. Effectively handling and shortening of waste. for recycle and energy transformation4. Adopting suitable and efficient method of processing to get minimum disposable matter5. Choosing the appropriate method of disposal and essential requirements6. Handling hazardous Waste and getting it stabilized	
Unit-I	Introduction to Solid Waste Management: need and objectives, waste management hierarchy, functional elements, environmental impact of mismanagement. solid waste: sources, types, composition, sampling and characteristics quantities, physical, chemical and biological properties. <p style="text-align: right;">(04 Hrs)</p>	
Unit-II	Generation of Solid Waste: factors affecting. storage and collection: general considerations for waste storage at source, types of collection systems, transfer station: meaning, necessity, transportation of solid waste: means and methods, routing of vehicles. <p style="text-align: right;">(04 Hrs)</p>	
Unit-III	Segregation & Material Recovery: objectives, stages of segregation, sorting operations, guidelines for sorting for materials recovery, e-waste management, biomedical waste management. <p style="text-align: right;">(05 Hrs)</p>	
Unit-IV	Waste Processing Technologies: composting, thermal conversion technologies incineration, treatment of biomedical wastes. energy recovery from solid waste: parameters affecting energy recovery, bio-methanation, fundamentals of thermal processing, pyrolysis, incineration, advantages and disadvantages of various technological options. <p style="text-align: right;">(05 Hrs)</p>	
Unit-V	Disposal Terminology: origin of domestic solid wastes, the quantity of refuse & transportation of refuse, the economics of refuse collection. solid waste in industries, agricultural waste – its effect on the environment. solid waste handling methods, treatment & disposal of solid wastes. sanitary landfills leachate and latest methods. integrated solid waste management. <p style="text-align: right;">(04 Hrs)</p>

Open Elective-2 offered by the Department of Computer Science and Engineering	
Course Category: OEC Course Code: OEC291C Course: Data Communication Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Networking basics, Operating system, Internet, Wireless Communication
Objectives	<ol style="list-style-type: none">1. Understand data communication principles through practical examples and case studies.2. Evaluate the efficiency of data communication protocols by analyzing their asymptotic runtime complexity and identifying recurrence relations.3. Analyze and compare the effectiveness of different data communication methods, aiding in the selection of the most suitable solutions for contexts.
Unit-I	Introduction: Data Communications, Networks, Network Types, Internet History, Protocols and Standards Protocol Layering, TCP/IP Protocol suite, The OSI model, Addressing. (04 Hrs)
Unit-II	Data and Signals: Data and Signals: Analog and Digital, Periodic Analog Signal, Digital Signals, Transmission Impairment, Data Rate limits, Performance. (04 Hrs)
Unit-III	Digital and Analog Transmission: Digital Transmission: Digital to Digital Conversion, Analog to Digital Conversion, Transmission Modes, Analog Transmission: Digital to Analog Conversion, Analog to Analog Conversion. (04 Hrs)
Unit-IV	Bandwidth Utilization and Switching: Bandwidth Utilization: Multiplexing, Spread Spectrum, Transmission Media: Guided Media, Unguided Media, switching: Circuit Switched Networks, Datagram Networks, Virtual Circuit Networks, Structure of a switch. (05 Hrs)
Unit-V	Error Detection and Correction: Introduction, Block Coding, Linear Block Codes, Cyclic Codes, Checksum Data Link Control: Data Link Control: Framing, Flow and Error Control, Protocols, Noiseless Channels, Noisy Channels, HDLC, Point to Point Protocol. (05 Hrs)

Faculty of Science & Technology	
Syllabus of Second Year B.Tech. (All Branches) (Semester IV)	
Open Elective-2 offered by the Department of Electronics and Computer Engineering	
Course Category: OEC Course Code: OEC291D Course: E-Waste Management Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In Semester Examination-I: 15 Marks In Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Knowledge of Reduce, Recycle and Reuse
Objectives	<ol style="list-style-type: none">1. To understand the scenario of E-waste2. Discuss key elements of E-waste management3. Understand key terms related to E-waste4. To reduce the adverse effects of E-waste on human health, the environment, planetary resources, and aesthetics.
Unit-I	Introduction: E-waste, Indian and global scenario of e-waste, Growth of Electrical and Electronics industry in India, E-waste generation in India, Composition of e-waste, E-waste pollutants, Possible hazardous substances present in e-waste, Environmental and Health implications. Concept of E-waste management. (04 Hrs)
Unit-II	E-waste Hazardous: Regulatory regime for e-waste in India, the Hazardous Waste (Management and Handling) Rules 2003, E-waste Management Rules 2015, Regulatory compliance including roles and responsibility of different stakeholders – producer, manufacturer, consumer, etc., Extended producer responsibility (EPR). Estimation and recycling of E-waste in metro cities of India. (04 Hrs)
Unit-III	End-of-life management of E-waste: Historical methods of waste disposal – dumping, burning, landfill; Recycling and recovery technologies sorting, crushing, separation; Life cycle assessment of a product – introduction; Case study – optimal planning for computer waste. (04 Hrs)
Unit-IV	Environmentally Sound E-waste Management: Emerging recycling and recovery technologies, Guidelines for environmentally sound management of e-waste, environmentally sound treatment technology for e-waste, Guidelines for establishment of integrated e-waste recycling and treatment facility, Case studies, and unique initiatives from around the world. (04 Hrs)

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester IV) Open Elective-2 offered by the Department of Electrical Engineering	
Course Category: OEC Course Code: OEC291E Course: Programmable Logic Controller Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Basic understanding of electrical circuits and industrial automation concepts. Familiarity with programming languages or logic diagrams.
Objectives	<ol style="list-style-type: none"> 1. Characteristics of a PLC 2. Know general PLC issues 3. Understanding of PLC programming and ladder logic. 4. Understand and design basic input and output wiring 5. Analysis and classification of the process control 6. Interlocking process control 7. Sequential process control 8. Random process control 9. Understand the operation of a PLC 10. Understanding of Siemens PLC hardware units and utilizing them.
Unit-I	PLC Fundamentals: Architectural Evolution of PLC, Block diagram of PLC's, Applications and Types, specifications, Manufacturers. (04 Hrs)
Unit-II	Selection of PLC components: Power supply, CPU, I/Os List, Communication bus Various ranges available in PLC's)I/O list selection Open-Circuit and Short-Circuit Tests Types of Inputs & outputs / Source Sink Concepts, Wiring of the I/O devices. (06 Hrs)
Unit-III	Programming instructions arithmetic and logical: Programming instruction: AND, OR, AND-before-OR, OR-before-AND, NO / NC contacts, Edge detection instructions. Set / Reset, Elementary data type. (04 Hrs)
Unit-IV	PLC Functions: Timer function, Counter function, Arithmetic function, Number comparison functions, Numbering systems, and number conversion function. (04 Hrs)
Unit-V	Analog PLC operations: Different PLC operations and applications of PLCs: Stepper motor control, speed control of D.C. motor, water level control, Traffic control, Temperature control. (04 Hrs)

Course Category: OEC Course Code: OEC291F Course: Information and Knowledge Management Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Computer Fundamentals
Objectives	<ol style="list-style-type: none">1. To understand the importance of information and knowledge management in organizations.2. To Gain knowledge of various theories and models related to information and knowledge management.3. Learn techniques for effectively capturing, organizing, and sharing information and knowledge.
Unit-I	Introduction to Information and Knowledge Management: Information and Knowledge Management, Data Sources and Types, Methods of Data Collection, Challenges in Managing Digital Information, Organizational Data Management, Attributes of Data, The Data Lifecycle, Data Sharing and Reuse, Planning for Data Management, Aspects of Data Management. (04 Hrs)
Unit-II	Information Documentation and Analysis: Organizing Information Using Organizational Systems and Conventions, Database Utilization for Content Organization and Analysis, Managing Information Throughout the Analysis Process, Comparison Between Raw and Analyzed Data Management, and Techniques to Facilitate Analysis. (04 Hrs)
Unit-III	Information Storage: Identifying and Managing Secure and Private Information, Policies for Information Security, Short-term Storage Solutions, Practical Aspects of Storage and Backup, Best Practices to Avoid Information Loss, Preserving and Archiving Information, Long-term Storage and Preservation Strategies, including File Formats and Media Selection. (05 Hrs)
Unit-IV	Information Architecture and Retrieval: Information Architecture, Types of Information Architecture, Constructing Information Architecture for Analytics, Information Governance and Security Measures, Frameworks for Information Governance, Considerations for Data Privacy and Compliance, Best Practices for Information Security, Methods for Information Access and Retrieval. Syllabus of Second Year B.Tech. (All Branches) (Semester IV)
Open Elective-2 offered by the Department of Mechanical Engineering

Course Category: OEC Course Code: OEC291G Course: Renewable Energy Resources Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Basic understanding of concepts of physics and thermodynamics.
Objectives	<ol style="list-style-type: none">1. To create awareness amongst students on sources of energy, energy crisis, and the alternatives available.2. To get exposure to recent advances in energy in the contemporary world.3. To know about various miscellaneous energy and its potential.
Unit-I	Introduction: Introduction to types of non-conventional energy sources, Energy Scenario in India and the world, Review of energy consumption pattern in various sectors in India, Introduction to energy policies and programs in India like International Solar Alliance, National Solar Mission, etc., Introduction to global climate change concerns like Clean Development Mechanism [CDM], Carbon Fund Concept of Carbon credit, Various international protocols. <p style="text-align: right;">(04 Hrs)</p>
Unit-II	Solar Energy Systems: Solar radiations, Types of solar radiation collectors, Estimation and measurement of solar energy, Characteristics of Photovoltaic cells, Solar cell arrays, Applications of Solar Heating & Cooling Systems like Solar still, Solar cookers, Solar ponds, Solar passive heating and cooling systems: Trombe wall, Solar power plant, Solar furnaces. <p style="text-align: right;">(04 Hrs)</p>
Unit-III	Biofuels: Review of Indian edible and non-edible oil sources, Examples of biodiesel crops in India, Storage and Characterization of biodiesel, Environmental and health effects of biodiesel, R&D in biodiesel Energy Generation from Waste Types: Biochemical Conversion: Sources of energy generation, Industrial waste, agro-residues; Aerobic & Anaerobic treatments, Factors affecting bio digestion. <p style="text-align: right;">(05 Hrs)</p>
Unit-IV	Wind Energy Systems: Basic principles of wind energy conversion, Site selection criteria, Wind data and energy estimation in India, Wind energy conversion systems, Horizontal and Vertical axis wind machines, Applications of wind energy, Environmental aspects, Wind Energy Program in India. <p style="text-align: right;">(05 Hrs)</p>

Faculty of Science & Technology Syllabus of Second Year B.Tech. (All Branches) (Semester IV) Open Elective-2 offered by the Department of Plastic and Polymer Engineering	
Course Category: OEC Course Code: OEC291H Course: Plastic Recycling Teaching Scheme: Theory: 02 Hrs./week	Credits: 2-0-0 In-Semester Examination-I: 15 Marks In-Semester Examination-II: 15Marks Teacher Assessment: 10 Marks Continuous Internal Evaluation: 10 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs.
Prerequisite	Basic knowledge of polymeric materials, additives, and their properties.
Objectives	To learn the basic concepts used in the recycling of polymers.
Unit-I	Significance of Recycling: Introduction and classification of waste. Global polymer production and consumption. Global polymer waste composition, quantities, and disposal, Identification of polymer for recycling. (04 Hrs)
Unit-II	Recycling Process: Collection, sorting, and segregation of waste; Use of advanced technologies such as artificial intelligence in sorting; recycling methods: primary, secondary, tertiary, and quaternary recycling, landfilling. (05 Hrs)
Unit-III	Recycling Equipment/Machinery: Equipment for primary and secondary recycling: shredder, granulator, pulverizer, shredder, cutter. Classification and types of reactors for tertiary recycling, use of x-ray photoelectron spectroscopy (XPS) in recycling, international standards in recycling. (04 Hrs)
Unit-IV	Recycling Techniques of Various Plastic and Rubber Products: PE/PP packaging films and woven sacks, PET bottles and films, PVC products, fiber-reinforced plastics (FRP), and rubber products, PP batteries. (04 Hrs)
Unit-V	Recycling of Plastics from Urban Waste: Physiochemical, mechanical, and rheological characteristics of recycled plastics, hydrolytic treatment of plastics waste containing paper, mixed plastic waste and its processing, recycling extrusion, and additives used in polymer recycling. (05 Hrs)
Unit-VI	Recycled Plastics End Use Applications: Use of recycling plastics in food packaging, Use of recycled plastics in construction and architecture. Single-use plastics recycling, healthcare plastic waste recycling. (04 Hrs)

Course Category: VSEC Course Code: VSE271 Course: Professional English Teaching Scheme: Theory: 01 Hr./week Practical: 02 Hrs./Week	Credits: 1-0-1 In-Semester Examination-II: 10 Marks Teacher Assessment: 15 Marks
Prerequisite	Knowledge of the English Language, Knowledge of LSRW techniques
Objectives	<ol style="list-style-type: none">1. To understand the concept of effective communication.2. To make use of the principles of business etiquette in professional behavior3. To utilize different strategies of reading and listening for effective communication4. To understand various forms of communication and demonstrate knowledge of surroundings during different communication situations.5. To construct an appropriate format of business documents and build a positive image as an effective communicator.6. To apply professional etiquette in professional life and inculcate the habit of standard behavior.
Unit-I	Basics of Communication: Communication Process and its elements, verbal and nonverbal communication, barriers of communication and strategies to overcome them, characteristics of effective communication. (02 Hrs)
Unit-II	Interpersonal Skills: Teamwork and team building: Team formation, team dynamics, leadership styles, Time Management: concept, strategies, Stress Management: types and techniques. (02 Hrs)
Unit-III	Receptive Skills of Language: Listening Skills: Purpose and importance of Listening, different types of listening, barriers & strategies of effective listening Reading Skills: Purpose and importance, types, barriers & strategies of reading. (03 Hrs)
Unit-IV	Oral Communication: Group Discussion, Interview techniques, public speaking. (02 Hrs)
Unit-V	Writing Skills: Business Letters, drafting an email, Writing Job Applications Resume Preparation, Writing reports. (02 Hrs)

Course Category: AEC Course Code: AEC272 Course: Personality and Leadership Development Skills Teaching Scheme: Practical: 04 Hrs./Week	Credits: 0-0-2 Teacher Assessment: 25 Marks
Prerequisite	Nil
Objectives	<ol style="list-style-type: none">1. Equip engineering graduates with the essential soft skills and leadership skills necessary to succeed in the professional world.2. Empower students to effectively market themselves through resume building, cover letter writing, and professional networking.3. Prepare students for the job search process by providing strategies for job market research, effective job search techniques, and interview preparation.4. Foster a mindset of continuous learning and career development to ensure long-term success and adaptability in the evolving engineering landscape.5. Prepare the student to appear for Aptitude test as a part of the campus recruitment process
List of Practical	<p>Activities to be performed in each session (session duration – 2 hrs.).</p> <ol style="list-style-type: none">1. Skills Assessment: Students assess their hard and soft skills, discuss within groups, and create a skills matrix.2. Problem-Solving Challenge: Teams brainstorm solutions to a complex engineering problem, present their solutions, and discuss their decision-making process.3. Industry Trends Research: Students research industry trends and create visual presentations summarizing their findings.4. Job Profile Analysis: In pairs, students analyse job profiles, compare and contrast them, and present their analysis to the class.5. Goal Setting: Students set SMART goals, create action plans, and receive feedback from peers.6. Resume Building Workshop: Students learn about resume writing best practices, review sample resumes, and draft their own resumes with guidance and feedback.7. LinkedIn Profile Development: Students update their LinkedIn profiles, receive peer feedback, and ensure completeness and professionalism.8. Elevator Pitch Competition: Students craft and deliver elevator pitches, compete for the most compelling presentations, and receive feedback.9. Internship Application Workshop: Students draft effective internship applications, review each other's materials, and receive guidance on researching opportunities.10. Mock Interview Marathon: Students participate in mock interviews, rotate through different scenarios, and receive feedback on their interview skills.

Master Copy

Page 71 of 76

Second Year B.Tech. (All Branches) w.e.f. 2024-25 (NEP 2020 Based Curriculum)

11. Hackathon Preparation Workshop: Students learn about hackathons, form teams, brainstorm project ideas, and begin planning for participation.
12. Project Competition Bootcamp: Students prepare for project competitions, form teams, brainstorm ideas, and develop prototypes or proposals for submission.
13. Team Building Challenge: Split the batch into smaller teams for collaborative problem-solving tasks that emphasize communication and teamwork.
14. Mock Leadership Scenarios: Assign students roles in various leadership scenarios to practice decision-making, delegation, conflict resolution, and empathy.
15. Community Service Project Planning: Guide students in planning a community service project, allowing them to take on different leadership roles and develop project management skills while addressing real-world issues.
16. Students will learn and solve problems related to fundamental numerical concepts, including the number system, LCM, HCF, and divisibility.
17. In this session, students will focus on percentages and ratios, learning to solve problems related to these concepts.
18. Students will delve into the application of time and work principles, solving problems that require understanding and application of these concepts.
19. This session will concentrate on profit and loss calculations, with students learning to solve related problems effectively.
20. Students will tackle problems related to determining ages, applying appropriate mathematical techniques to arrive at solutions.
21. Geometric concepts will be the focus of this session, with students learning about shapes, their properties, and perimeter calculations.
22. Arithmetic concepts like progressions and equations will be covered in this session, with students practicing solving problems based on these topics.
23. Students will review and consolidate their understanding of average and decimal fraction concepts, solving related problems to reinforce learning.
24. This session will cover the intricacies of calendar and clock problems, with students learning to solve such problems effectively.
25. Students will learn and solve problems based on word patterns and number series, honing their pattern recognition skills.
26. Logical reasoning basics will be covered in this session, with students learning and solving problems related to blood relations and coding-decoding.
27. Direction sense and symbols will be the focus of this session, with students learning to solve problems based on these concepts effectively.
28. Advanced logical reasoning skills will be developed in this session, with students tackling problems related to syllogism and logical puzzles.
29. Visual reasoning concepts will be explored in this session, with students learning to solve problems based on visual patterns effectively.
30. In the final session, students will engage in a comprehensive review of all topics covered in the course and participate in a mock test simulation to assess their understanding and readiness for placement exams.

Syllabus of Second Year B.Tech. (Civil Engineering) (Semester IV)

Course Category: **PCC**
Course Code: CED273
Course: **Fluid Mechanics Lab**
Teaching Scheme: Practical: 02 Hrs/Week

Credits: 0-0-1
Teacher Assessment: 25 Marks
End Semester Oral Examination: 25 Marks

**List of
Practical**

PRACTICAL - Minimum 8 practicals to be performed.

1. Study of Pressure Measuring Devices
2. Determination of Metacentric Height
3. Verification of Bernoulli's Equation.
4. Calibration of Venturimeter/ Orifice Meter
5. Determination of Viscosity of Fluid.
6. Determination of Pipe Friction Factor.
7. Determination of Minor Losses
8. Study of Hydraulic Jump.
9. Study of Notches And Weirs
10. Determination of Coefficient Of Discharge for an Orifice/Mouthpiece

Field Visit Report to be carried to WALMI.

The assessment of term work shall be done on the basis of the following.

- Continuous assessment
- Performing the experiments in the laboratory
- Oral examination conducted on the syllabus and term work mentioned above.

Faculty of Science & Technology
Syllabus of Second Year B.Tech. (Civil Engineering) (Semester IV)

Course Category: **PCC**
Course Code: CED274
Course: **Material Testing Lab**
Teaching Scheme: Practical: 02 Hrs/Week

Credits: 0-0-1
Teacher Assessment: 25 Marks
End Semester Oral Examination: 25 Marks

**List of
Practical**

PRACTICAL - All Experiments are compulsory

1. Determine fineness of cement by sieving method.
2. Determine standard, consistency, initial and final setting time of ordinary Portland cement.
3. Determine compressive strength of ordinary Portland cement.
4. Determine specific gravity of ordinary Portland cement.
5. Determine bulking of sand.
6. Determine water absorption of fine and coarse aggregates.
7. Determine Fineness modulus of fine aggregate by sieve analysis.
8. Determine Fineness modulus of coarse aggregate by sieve analysis.
9. Determine aggregate impact value.
10. Determine aggregate crushing value.
11. Determine abrasion value of aggregate.
12. Determine aggregate elongation index and flakiness index.
13. Determine workability of concrete by slump cone test.
14. Determine workability of concrete by compaction factor test.
15. Determine compressive strength of concrete for 7 days
16. Determine compressive strength of concrete by any one method of NDT.

The assessment of term work shall be done on the basis of the following.

- Continuous assessment
- Performing the experiments in the laboratory
- Oral examination conducted on the syllabus and term work mentioned above.

Brief about - Honor and Double Minor Degree program

As per the NEP 2020 guidelines, **Honor Degree** courses are offered by Department (Major Discipline), whereas the Minor Degree courses (referred as **Double Minor**) are offered by another department. Honor Degree or Double Minor Degree is **Optional**. The students those who fulfill the eligibility norms can enroll for it. The Table 1 and 2 give the list of such programs.

Table 1: Honours Degree Programs

Sr. No.	Name of Honours Degree Program	Offered by
1	Smart Agritech	Agricultural Engineering
2	Green Technology and Sustainable Environment	Civil Engineering
3	Digital Media	Computer Science and Design
4	Cloud Computing	Computer Science and Engineering
5	Internet of Things	Electronics and Computer Engineering
6	Electric Vehicles	Electrical Engineering
7	Generative AI	Artificial Intelligence and Data Science
8	Robotics and Automation	Mechanical Engineering
9	Polymeric Materials	Plastic and Polymer Engineering

Table 2: Minor Degree Programs

Sr. No.	Name of Minor Degree Program	Offered by
1	Advanced Agricultural Engineering	Agricultural Engineering
2	Sustainable Infrastructure and Smart Cities	Civil Engineering
3	Design Engineering	Computer Science and Design
4	Cyber Security	Computer Science and Engineering
5	Data Science	Electronics and Computer Engineering
6	Sustainable Energy Engineering	Electrical Engineering
7	Data Analytics	Artificial Intelligence and Data Science
8	Mechanical Engineering Systems and Automation	Mechanical Engineering
9	Polymeric Products and Project Economics	Plastic and Polymer Engineering

Student can opt for either Honor or Minor degree program at a time and not the both.

The course curriculum and guidelines are given in a separate Information Booklet, available at the Department.

Dr. AJJ D. Suryad, Dean (Academics)
