

G.S. Mandal's
Maharashtra Institute of Technology Aurangabad
Department of Emerging Science and Technology

1. **Event Date:** 15/10/22
2. **Event:** Webinar on Application of Artificial Intelligence
3. **Speakers at the Event:** Prof Rakhi Bhardwaj ,Assistant Professor in VIT

Objectives: To make students aware of all the possibilities involved in Artificial Intelligence.

Outcome: Acquainted with area of Artificial Intelligence.

Gist of the event: The webinar was attended by 61 students of Artificial Intelligence & Data Science along with the faculty members. Artificial Intelligence (AI) is the simulation of human intelligence processes by machines, especially computer systems. Specific applications of AI include expert systems, natural language processing (NLP), speech recognition and machine vision. Dr.Manasi Patwardhan spoke on recent advancements in technology and frequent changes in technologies, continuous transformation regarding Artificial Intelligence.

She focused that all changes are constant, definition cannot be changed and gave a simple example of graph. She mentioned how mathematics is applied in solving problems of Artificial Intelligence, the webinar focused on introducing students to different types of techniques, and motivating students to think of its practical applications. The participants were also encouraged to ask questions.

Smt. Rakhi Jaykumar Bharadwaj is presenting

Contents of this Presentation

1. Introduction
2. Road Map to Learn AI Applications
3. Applications
 1. Min-Max Algorithm (Tic - Tac Toe)
 2. Alpha- Beta Pruning
 3. Constraint Satisfaction Problem like Crypt arithmetic problem
 4. Means Ends Analysis
