

Outward No.: MIT/Civil/2025/_____

Date: 5-Sep-25

REPORT

Title of Activity / Event: Alumni Interaction
Date & Time: Sept 4, 2025 at 11:30 am
Venue: Class Room LH-III
Organized by: Department of Civil Engineering

1. Introduction

MIT Alumni (Batch 2017-21) **Er. Swapnil Patil** visited the campus for completing his document work related to Migration Certificate and Transfer Certificate. The Department of Civil Engineering utilized this opportunity to arrange a brief interaction session with Second Year Civil Engineering students.

During the session, Er. Patil expressed his happiness over the growth of departmental activities and congratulated the department on its recent achievement of **NBA Accreditation**. He emphasized the wide range of opportunities in **Building Information Modelling (BIM)** and encouraged students to keep upgrading their technical skills in line with industry demands.

He advised students to gain **site experience in the initial years**, as on-site learning provides practical exposure that is different from planning in BIM. He recommended at least five years of site work before moving into BIM or managerial roles, which would help them secure higher positions and better salaries in India and abroad. He assured the students that the **golden days for Civil Engineers are ahead**.

Additionally, he invited students to visit his **construction site at Nyati Builder, Pune**, to learn about new technologies being adopted in the industry.

2. Objectives

- To provide students with an opportunity to learn and interact with alumni.
- To inspire students through real-life experiences and professional insights shared by alumni.

3. Details of the Program

- **Resource Persons / Guests / Experts:**

- **Participants (Students/Faculty):**
 - Dr. Rahul Agrawal
 - Prof. Umesh Salunkhe
- **Number of Participants: 35**

5. Photographs

6. Outcome / Conclusion

- Students gained knowledge about current industry practices, skill enhancement, and career opportunities in Civil Engineering.
- The program enhanced awareness among students regarding the importance of upgrading technical and soft skills along with academic learning.
- Feedback from students and faculty was positive, highlighting that the interaction was motivating, insightful, and helpful in career orientation.

7. Acknowledgment

We sincerely thank the Management, Director/Principal, and Head of Department for their constant support and encouragement in organizing this event.
