REPORT

Activity: Meeting with MJP Engineers and Municipal Corporation Engineers with Faculty Members

Date: August 25, 2025

Time: 12:35 pm to 1:15 pm

Venue: Board Room, Civil Engineering Department

Brief Report:

A team of **MJP Engineers and Municipal Corporation Engineers** visited the MIT campus for official work with the Management. On this occasion, **Dr. Prashant Awsarmal, Head of Department**, took the opportunity to arrange an interactive meeting between the visiting engineers and faculty members of the Civil Engineering Department.

The meeting provided an excellent platform for faculty to gain insights into the **New Water Supply System of Chhatrapati Sambhajnagar** and the challenges faced in its implementation.

The engineers highlighted the importance of:

- **Timely project completion** to avoid cost escalation.
- **Design considerations** that integrate on-site challenges to ensure feasibility during execution.
- **Accurate calculation and maintenance of water head** in real-time scenarios.
- **Collaboration opportunities** between academia and practicing engineers to bridge the gap between theory and field practices.

This interaction proved highly valuable as it gave faculty members a chance to understand real-world engineering challenges and exchange practical knowledge with field experts.

Outcome:

- Faculty members gained practical exposure to water supply system design and execution.
- Scope for **academic–industry collaboration** in water supply projects was identified.
- The meeting strengthened ties between academia and practicing engineers for mutual growth.

Prepared by Dr. Rahul Agrawal and Dr Prashant Awsarmal
