

Report

G.S. Mandal's Maharashtra Institute of Technology Chhatrapati Sambhajnagar Department of Civil Engineering

Date: 29th April 2026

Venue: LH-II Classroom

Organized For: Civil Engineering Students

The “UltraTech INDIA NEXT STIMULUS – A Civil Engineering Quiz” was conducted on 29th April 2026 in the LH-II Classroom for students of the Civil Engineering Department. The program aimed to encourage technical learning, competitive aptitude, and career development among engineering students through participation in a national-level quiz initiative.

The event was conducted under the guidance and coordination of MIT Alumni Ajayendra Singh and UltraTech TCH Jaswant Singh Sodhi, who interacted with the students and explained the objectives, structure, and opportunities associated with the competition. The session was further coordinated by faculty members Dr. Manish Dixit (HoD), Ather Khan, and Alka Wevhal.

The quiz initiative, supported by UltraTech Cement, is designed to provide Civil Engineering students with a platform to showcase their technical knowledge and analytical skills at a national level. During the session, students were informed about the various rounds of the competition, registration procedures, eligibility criteria, and the opportunities for internships and pre-placement interviews associated with the program. Students from the Civil Engineering Department participated enthusiastically in the awareness and registration session. The coordinators motivated students to actively engage in such technical and industry-oriented activities that contribute to academic enrichment, professional exposure, and overall personality development.

The program also served as an important interaction platform between alumni, faculty members, and students, thereby strengthening industry-academia and alumni engagement within the institution. The initiative encouraged students to prepare themselves for future technical competitions and career opportunities in the Civil Engineering domain. The event concluded successfully with active student participation, guidance for upcoming stages of the competition, and appreciation for the efforts of the organizing team and faculty coordinators.
